

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

~~~~~  
By Authority of the Registrar General.  
~~~~~

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 137.] **Marriages**—*October, November, December, 1882.*
Births and Deaths—*January, February, March, 1883.* [Price 9d.]

*General Register Office, Somerset House,
30th April, 1883.*

The resident POPULATION of the UNITED KINGDOM in the middle of 1883 is estimated at 35,631,290 persons; that of England and Wales at 26,762,974, of Scotland at 3,825,744, and of Ireland at 5,042,572.

In the United Kingdom the *births* of 295,493 children, and the *deaths* of 198,426 persons, were registered in the three months ending 31st March 1883. The recorded natural increase of population was thus 97,067. The registered number of persons married in the quarter ending 31st December 1882 was 144,894.

The birth-rate in the United Kingdom in the first quarter of 1883 was 33·6 per 1000, and the death-rate 22·6. The marriage-rate in the fourth quarter of 1882 was 16·3 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars General of those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2158 registration sub-districts of England and Wales during the quarter ending 31st March 1883; and the MARRIAGES in 14,620 churches or chapels, in 9005 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 31st December 1882.

Marriages.

During the three months ending December last, the marriages of 120,718 persons were registered in England and Wales, corresponding to an annual rate of 18·1 per 1000 of the estimated population in the middle of 1882. This rate was 0·6 below the mean rate in the corresponding quarters of the ten years 1872–81, and 0·3 below the rate in the last quarter of 1881. The annual marriage-rate in the fourth quarter of last year ranged in the several counties from 11·3 and 12·3 in

Hereford and the extra-metropolitan portion of Middlesex, to 22·0 in Suffolk and in Norfolk, and 22·7 in Nottingham.

The marriage-rate in England and Wales during the year 1882 was equal to 15·4 per 1000, against 14·4, 14·9, and 15·1 in the three preceding years; it was, however, 0·5 below the mean rate in the ten years 1873-82. The marriage-rate declined steadily from 17·6 in 1873 to 14·4 in 1879, which was lower than any previous year on record; since 1879 the recovery in the marriage-rate has been slow but continuous, the rate in 1882 being 15·4.

Births.

The births registered in England and Wales during the three months ending March last were 232,086, showing an increase of 8284 upon the number returned in the corresponding period of 1882. The annual birth-rate was equal to 35·2 per 1000 of the estimated population, and was 1·0 below the mean rate in the ten preceding corresponding quarters. The birth-rate last quarter showed, however, an increase of 0·8 upon that which prevailed in the corresponding period of 1882, when the birth-rate was lower than that recorded in the first quarter of any year since 1850. The lowest county birth-rates last quarter were 25·9 in Huntingdonshire, and 27·3 in Herefordshire; and the highest 39·9 in Durham, and 40·2 both in Staffordshire and in Nottinghamshire.

In the twenty-eight great towns the birth-rate last quarter averaged 36·7 per 1000, and was 1·5 above the general English rate. The rate was 36·2 in London, and averaged 37·1 in the twenty-seven great provincial towns. In these provincial towns the rates ranged from 29·3 and 31·2 in Huddersfield and Brighton, to 40·2 in Derby, 40·6 in Blackburn, 40·9 in Nottingham, 41·6 in Preston, and 42·0 in Sunderland. In fifty other large town districts the birth-rate averaged 36·9, and was 0·2 above the mean rate in the larger towns; the lowest rates in these fifty districts were 21·8 in Bath, 27·5 in Hastings, 27·8 in Southport, and 27·9 in Shrewsbury; the highest rates were 44·4 in Dudley, 47·0 in Warrington, and 48·1 in Wigan.

Movement of the Population.

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 87,139 and 83,478 in the first or March quarters of 1881 and 1882, was 85,230 in the first three months of this year. It appears from returns issued by the Board of Trade that 51,095 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 689 whose nationality was undistinguished, and excluding 7484 foreigners, the emigrants of British origin were 43,611, including 29,209 English, 4892 Scotch, and 9510 Irish; in the three preceding corresponding quarters the numbers of British emigrants were 33,767, 28,788, and 42,155, respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1091 from England, 1279 from Scotland, and 1886 from Ireland. Compared with the corresponding quarter of 1882, the proportion of emigrants showed an increase in England, whereas it had slightly declined in Scotland and in Ireland.

Prices and Pauperism.

The average price of wheat during the three months ending March last was 41s. 3d., and was 4s. 2d. below that which prevailed in the preceding quarter; it was lower than the mean price in the first quarter of any year since 1879, when it was only 39s. 0d. The mean wholesale price of beef and of mutton last quarter was 6½d. and 8d., respectively; the mean price of beef was ⅔d., and that of mutton ⅔d., above the mean prices prevailing in the preceding quarter. Mutton was dearer than in any preceding quarter on record, except in June 1873, when it was 8½d. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 16s. 6d. per ton, showing a decrease of 8d. from the mean price in the preceding quarter, but was 1s. 6d. above that which prevailed in the first quarter of 1882. The mean price of Consols was 102½l. showing an increase of 7s. 6d. upon the mean price in the preceding three months. The minimum annual rate of discount charged at the Bank of England, which had been raised to 5 per cent. on the 14th September last, was reduced to 4 per cent. on 25th January, to 3½ per cent. on 15th February, and to 3 per cent. on 1st March.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 747,455, of whom 189,391 received in-door and 558,064 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending March last was equal to 27·9 per 1000, against 28·1 and 27·0 in the two preceding corresponding quarters; in the fourth quarter of 1870 the proportion of paupers was 43·1 per 1000. Compared with the first quarter of 1882 the proportion of pauperism in the first three months of this year showed an increase of 3·3 per cent. During last quarter 25·3 per cent. of the total paupers were in receipt of in-door relief, whereas in the corresponding period of 1871 the proportion of in-door to total paupers did not exceed 14·0 per cent.

Meteorology.

The remarks upon the Meteorology of the quarter, at the Royal Observatory, Greenwich, and at other stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found on pp. 65-72 with accompanying Tables. The mean reading of the barometer during the quarter was 29·796, and was 0·033 above the mean reading for the corresponding periods in 42 years; the mean reading for February showed a slight excess, while that for January was below the average. The mean temperature of the air in the quarter was 40°·0 and was 1°·2 above the average for the corresponding period in 112 years. Mild weather prevailed during January and February, whereas during the greater part of March the temperature was unseasonably low and snow fell frequently. The monthly mean temperature exceeded the average by 4°·7 and 3°·9 respectively in January and February, whereas in March the mean showed a deficiency of 5°·0. At 40 stations of observation the mean temperature of the quarter ranged from 37°·8 at Wolverhampton and Burslem, to 42°·7 at Ventnor, and 43°·5 at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 5·36 inches, and was 0·35 inch above the average amount in the corresponding periods of 67 years. The rainfall was equal to 1·69 inches in January, 2·89 inches in February, and 0·78 inch in March; the amount was below the average in January and March, whereas it showed an excess of 1·32 inches in February. At 40 stations

of observation the recorded rainfall ranged from 4·68 inches at Cambridge to 11·64 inches at Bolton, 13·21 inches at Truro, and 14·95 inches at Totnes.

The number of hours of bright sunshine recorded at Greenwich during the quarter was 201·4, and was 27·8 above the average number recorded in the five preceding corresponding periods.

State of the Public Health ; Deaths.

During last quarter 146,856 deaths were registered in England and Wales, and were equal to an annual rate of 22·3 per 1000 of the estimated population. This death-rate was 1·0 below the mean rate in the ten preceding corresponding quarters, but exceeded by 0·8 and 0·7, respectively, the exceptionally low rates in the first quarters of 1881 and 1882. Judged by the weekly returns from the twenty-eight great towns the rate of English mortality would have been again exceptionally low last quarter but for the unusually cold weather during March. The rate of mortality in these towns, which did not exceed 22·7 and 22·8 in January and February, rose to 26·1 in March. Assuming a constant proportion in the three months of the quarter between the rate of mortality in England and Wales and in the twenty-eight towns, it may be estimated that the rate in England and Wales did not exceed 21·3 and 21·4 per 1000 in January and February, and that it rose to 24·5 in March.

The death-rates in the several English counties last quarter ranged from 17·3 in the extra-metropolitan portion of Surrey and 17·6 in Sussex, to 25·2 in Lancashire, and 26·9 in Monmouthshire. Compared with the county rates in the first quarter of 1882, the rates showed a proportionally large excess in Berkshire, Huntingdonshire, Suffolk, Dorset, Shropshire, Yorkshire (East Riding), Cumberland, Monmouthshire, and in North Wales.

The 146,856 deaths registered during the quarter included 75,082 of males, and 71,774 of females; the annual death-rate among males was 23·4, and among females 21·2, per 1000 estimated to be living of each sex. In equal numbers living, the deaths were 110 of males to 100 of females. In the corresponding quarter of 1882, the proportion of male mortality was as 111 to 100 of female mortality.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of fifteen and a half millions of persons, the death-rate was equal to 23·2 per 1000; in the remaining and chiefly rural population of about ten and a half millions of persons, the rate did not exceed 20·8. These urban and rural rates were respectively 1·5 and 0·5 below the average rates in the ten preceding corresponding quarters. The urban rate corresponded with, whereas the rural rate exceeded by no less than 1·7, the low rate that prevailed in the first quarter of last year. In equal numbers living, the deaths were 112 in the urban to 100 in the rural population, against an average proportion of 116 to 100 in the ten preceding corresponding quarters. The excess of urban mortality last quarter was, therefore, considerably below the average the fatal effect of the cold March having been apparently much greater in rural than in urban districts.

In the twenty-eight great towns, including London, and having an estimated population (in the middle of this year) of more than eight and a half millions of persons, the death-rate was equal to 23·8 and was only 0·6 above the general urban rate. The death-rate did not exceed 22·1 in London, whereas it averaged 25·2 in the twenty-seven provincial towns, among which it ranged from 18·4 and 19·6 in Derby and Brighton, to 27·9 in Sunderland, 29·2 in Blackburn, 30·2 in

Manchester, and 30·9 in Liverpool. In fifty other large town districts, with an aggregate population estimated at rather more than two and a half millions of persons, the mean death-rate was 23·2, and was 0·6 below the mean rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 16·9 in Hastings, 17·2 in Dover and in Darlington, and 17·4 in Barrow-in-Furness; the highest rates were 28·1 in Maidstone, 28·9 in Exeter, 29·3 in Stoke-upon-Trent, and 30·7 in Ashton-under-Lyne.

MORTALITY AT DIFFERENT AGES.—The 146,856 deaths last quarter included 32,610 of infants under one year of age, 71,959 of children and adults aged between one and 60 years, and 42,287 of persons aged upwards of 60 years.

The rate of infant mortality, measured by the proportion of deaths under one year to births registered, was equal to 141 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality averaged 147 per 1000, and ranged from 167 in 1875 to 134 in 1881. The lowest county rates of infant mortality last quarter were 103 in Wiltshire, 104 in Middlesex (extra-metropolitan), and 109 in Sussex; the highest were 167 in the East Riding of Yorkshire, in Monmouthshire, and in North Wales, and 171 in Shropshire. In the twenty-eight great towns the proportion of infant mortality averaged 147 per 1000, and exceeded the general English rate by 6. While the rate did not exceed 135 in London, it averaged 157 in the twenty-seven provincial towns, among which it ranged from 109 in Brighton, and 114 in Derby, to 191 in Bolton, 194 in Hull, and 204 in Preston. In the fifty other town districts infant mortality averaged 151 per 1000 births; while the proportion was so low as 84 in Dover, 94 in Tynemouth, and 106 in Chester, it ranged upwards to 200 in Stoke-upon-Trent, 203 in Dudley, 218 in Maidstone, and 242 in Exeter.

The annual rate of mortality among persons aged between one and 60 years was equal to 12·2 per 1000 persons estimated to be living at these ages, against an average of 12·8 in the ten preceding corresponding quarters. In the twenty-eight great towns the death-rate at these ages averaged 14·2 per 1000, and ranged from 10·1 in Derby, and 10·3 in Bristol, to 17·6 in Blackburn, 19·7 in Manchester, and 21·2 in Liverpool.

Among persons aged upwards of 60 years the annual death-rate averaged 85·8 per 1000, and was 1·0 below the mean rate at these ages in the ten preceding first quarters of 1873-82. In the twenty-eight towns the death-rate at these ages averaged 92·6 per 1000, and was 6·8 above the general English rate. In London this rate was equal to 87·1, while it averaged 97·9 in the twenty-seven provincial towns, and ranged from 72·4 and 73·4 in Derby and Cardiff, to 122·0 in Manchester, 137·5 in Wolverhampton, and 139·5 in Halifax.

The rate of mortality at all ages last quarter was 4·3 per cent. below the mean rate in the ten preceding corresponding quarters; the decline was equal to 4·8 per cent. among infants under one year of age, to 4·7 per cent., among children and adults aged between one and 60 years, and to 1·2 per cent. among persons aged upwards of 60 years.

ZYMOTIC DISEASES.—The 146,856 deaths from all causes included—

3462	attributed to whooping-cough.
2837	„ scarlet fever.
2137	„ fever.
1820	„ measles.
1657	„ diarrhœa.
1002	„ diphtheria.
269	„ small-pox.

Thus the total number of deaths ascribed to these causes was 13,184, corresponding to an annual rate of 2·00 per 1000, against an average rate of 2·58 for the ten preceding first quarters.

The lowest county rates from these causes were 0·18 in Rutlandshire, 0·75 in Dorsetshire, and 0·80 in Wiltshire; while the highest were 2·94 in Buckinghamshire, 3·09 in the East Riding, and 3·33 in Monmouthshire. In the twenty-eight great towns the rate averaged 2·27, ranging from 0·40 in Brighton, and 0·90 in Norwich, to 3·74 in Blackburn, 3·76 in Liverpool, and 4·69 in Hull. In fifty other considerable towns the rate averaged 2·33, rising, however, to 4·50 in Dudley, 4·53 in Gateshead, 4·74 in Gloucester, and 6·25 in Maidstone. In the remainder of England and Wales, after subtracting the seventy-eight towns, the rate was 1·78.¹

The deaths from *whooping-cough* numbered 3462, corresponding to an annual rate of 0·52 per 1000, against an average of 0·63 for the ten preceding first quarters.

No death from this disease was registered in the little county of Rutland, and only one in Huntingdonshire, while the rate was 1·04 in Cumberland, 1·49 in North Wales, and 1·65 in the East Riding. In the twenty-eight great towns the rate averaged 0·65, ranging from 0·05 in Huddersfield and 0·07 in Brighton, to 1·29 in Cardiff, 1·34 in Plymouth, and 3·12 in Hull. In fifty other considerable towns the rate averaged 0·60, but was 2·11 in Reading, 2·17 in Dudley, and 2·66 in Maidstone. The mortality from this disease was also excessive in Tring, Hartest, Neston, Whitehaven, Chepstow, Llandwrog, Carnarvon, and Beaumaris sub-districts.

The deaths from *scarlet-fever* numbered 2837, corresponding to an annual rate of 0·43 per 1000, against an average rate of 0·66 for the ten preceding first quarters.

No death was registered as due to this cause in Rutlandshire, while in the remaining counties the rate ranged from 0·05 in Devonshire and 0·06 in Norfolk, to 1·35 in Monmouthshire and 1·62 in Lincolnshire. In the twenty-eight great towns the rate averaged 0·48, but, while no deaths from this cause were registered in Norwich or Plymouth, the rate was 1·39 in Sheffield and 1·67 in Leeds. In fifty other considerable towns the rate averaged 0·43, ranging upwards to 1·19 in Middlesbrough, 1·20 in Rotherham, 1·54 in Accrington, and 2·74 in Gloucester. Among the sub-districts showing high mortality from this disease are Illogan, Camborne, Stourbridge, Kingswinford, Great Grimsby, Chester-le-Street, Tredegar, Llangattock, and Llanelly.

The deaths from *fever*, including typhus, enteric fever, and also simple continued and ill-defined forms of fever, numbered 2137, corresponding to an annual rate of 0·32 per 1000, against an average of 0·40 for the ten preceding first quarters.

No death was registered as due to fever in Rutlandshire or in Herefordshire, while the rate was 0·61 in Northumberland, 0·62 in Lancashire, and 0·70 in Durham. In the twenty-eight great towns the rate averaged 0·38, ranging from 0·06 in Leicester and 0·11 in Brighton, to 1·27 in Liverpool and 1·78 in Blackburn. In fifty other considerable towns the rate averaged 0·38, ranging upwards to 1·04 in Ystradyfodwg, 1·05 in Barrow-in-Furness, 1·08 in Chester, and 1·34 in Gateshead. Fever was also specially prevalent in Hitchin and Bridgend sub-districts.

The deaths from *measles* numbered 1820, corresponding to an annual rate of 0·28 per 1000, against an average rate of 0·38 for the ten preceding first quarters.

No death from this disease was registered in the little counties of Rutland and Huntingdon, and only one each in the counties of Cambridge, Dorset, and Somerset, while the rate in Buckinghamshire was as high as 1·82 per 1000. In the twenty-eight great towns the rate averaged 0·34; but, while no deaths were registered as due to this disease in Wolverhampton, Derby, Bolton, or Halifax, the rate was 0·49 in London and 0·71 in Liverpool. In fifty other considerable towns the rate averaged 0·37, but was 1·53 in Stoke-upon-Trent, 2·01 in Merthyr Tydfil, 2·40 in Maidstone, and 2·45 in Ystradyfodwg. An excessive mortality from this disease was recorded in Chalfont, Wycombe, Aylesbury, Waddesdon, Fordham, Hinckley, and Rock Bedwelty sub-districts.

The deaths from *diarrhœa* numbered 1657, corresponding to an annual rate of 0·26 per 1000, against an average of 0·29 for the ten preceding first quarters.

The highest county rates were 0·52 in Shropshire, and 0·53 in Herefordshire. In the twenty-eight great towns the rate averaged 0·21, being thus lower than in the entire country. It was, however, 0·74 in Blackburn, and 0·98 in Preston. In fifty other considerable towns the rate averaged 0·31.

The deaths ascribed to *diphtheria* numbered 1002, corresponding to an annual rate of 0·15 per 1000, against an average of 0·13 for the ten preceding first quarters. No death was ascribed to this cause in the little county of Rutland, while the rate was 0·44 in Nottinghamshire, 0·45 in Cambridgeshire, and 0·62 in Huntingdonshire. In the twenty-eight great towns the rate averaged 0·16, ranging from 0·00 in Brighton, Norwich, Derby, and Blackburn, to 0·26 in Nottingham, 0·27 in Sunderland, and 0·40 in Portsmouth. In fifty other considerable towns the rate averaged 0·11, rising, however, to 0·47 in Walsall and to 0·73 in Merthyr Tydfil. Several sub-districts showed rates above 3 per 1000. Among these may be mentioned Huntingdon, Walsoken, Madeley, and Llanboidy.

The deaths from *small-pox* numbered 269, corresponding to an annual rate of 0·04 per 1000, against an average of 0·11 for the ten preceding first quarters. The deaths from this cause were, however, considerably more numerous than in either of the two immediately preceding quarters, in which they had been 209 and 190 respectively. Of the 269 deaths, 52 occurred in London, 36 in West Bromwich, 27 in Newcastle-upon-Tyne, 17 in Gateshead, and 14 in Walsall. Of the remainder, 54 occurred in other parts of Staffordshire, 21 in other parts of Durham, 9 in Yorkshire, 8 in Warwickshire, and 5 in Lancashire.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in fifty other large town districts, and in the rest, or comparatively rural part, of England and Wales:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the First Quarter of 1883.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.
England and Wales -	2·00	0·04	0·28	0·43	0·15	0·52	0·32	0·26
28 Great Towns -	2·27	0·05	0·34	0·48	0·16	0·65	0·38	0·21
50 other Towns -	2·33	0·13	0·37	0·43	0·11	0·60	0·38	0·31
England and Wales, less the 78 Towns -	1·78	0·02	0·22	0·40	0·15	0·44	0·23	0·27

CERTIFICATION OF CAUSES OF DEATH.—The causes of 132,738, or 90·4 per cent. of the 146,856 deaths registered in England and Wales during last quarter, were certified by registered medical practitioners in attendance during the last illness of deceased persons, and 7880 or 5·4 per cent. by coroners in inquest cases. The causes of the remaining 6238 or 4·2 per cent. of the deaths were uncertified; each of these proportions corresponding with that prevailing in the last quarter of 1882. The proportion of uncertified deaths did not exceed 1·4 per cent. in London, whereas it averaged 4·7 per cent. in the rest of England and Wales. In the various counties the proportion of uncertified deaths ranged from 1·2 and 1·4 per cent. in Wiltshire and Buckinghamshire, to 7·1 in Herefordshire, 7·8 in Cornwall, and 8·0 in Westmorland. In Wales 11·1 per cent. of the causes of death were uncertified, the proportion being equal to 10·9 in South Wales, and 11·5 in North Wales.

In the twenty-eight great towns the proportion of uncertified deaths averaged 2·8 per cent.; as above-mentioned it did not exceed 1·4 in London, whereas it averaged 3·8 in the twenty-seven provincial towns. The percentage of uncertified deaths in these provincial towns did not exceed 0·6 both in Plymouth and Cardiff, whereas it ranged upwards to 7·2 both in Oldham and Wolverhampton, and 9·5 in Halifax. The three last-mentioned towns also showed the largest proportion of uncertified deaths in the last quarter of 1882.

VIOLENT DEATHS.—The deaths referred last quarter to different forms of violence were 4437; they were equal to an annual rate of 0·67 per 1000 of the estimated population, and to 3·0 per cent. of the total deaths. The death-rate from violence in the various counties ranged from 0·33 in Surrey (extra-metropolitan), 0·34 in Bedfordshire, and 0·38 in Cornwall, to 0·84 in Monmouth, 0·87 in Warwick, and 1·00 in South Wales. In the twenty-eight great towns the deaths from violence were equal to an annual rate of 0·82 per 1000; in the several towns the rates ranged from 0·12 and 0·27 in Preston and Halifax, to 1·23 in Sunderland, 1·33 in Liverpool, and 1·45 in Bradford. The high death-rate from violence in Bradford was caused by the registration of 49 deaths which resulted from the fall of a mill-chimney.

INQUESTS.—During last quarter 7880 inquest cases were registered, equal to 5·4 per cent. of the total deaths; this exceeded by 0·4 the mean proportion in the ten preceding corresponding quarters. In the twenty-eight towns the proportion of inquests averaged 7·0 per cent.; while they were but 1·6 in Preston, and 2·0 in Oldham, they ranged upwards to 9·5 in Manchester, 10·1 in Bradford, and 11·0 in Leicester.

DEATHS IN PUBLIC INSTITUTIONS.—The deaths recorded last quarter in work-houses, in hospitals, and in public lunatic asylums were 15,896, and equal to 10·8 per cent. of the total deaths; this proportion exceeded by 0·9 the mean percentage in the first quarters of the ten years 1873–82. In the twenty-eight towns 8485, or 16·6 per cent., of the total deaths were recorded in the principal public institutions. The percentage of deaths in institutions did not exceed 7·0 in Bradford and 7·3 in Blackburn, whereas it ranged upwards in the other towns to 19·3 in Liverpool, 20·8 in London, and 20·2 in Manchester. In the rest of England and Wales the proportion of deaths in institutions, which in the twenty-eight towns averaged, as before stated, 16·6 per cent. did not exceed 7·7 per cent.

HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the first quarter of this year in thirty Colonial and Foreign cities, having an aggregate population of about fourteen and a half millions of persons, was equal to 29·5 per 1000. The average rate in the twenty-three European cities was 29·5 per 1000, against 23·8 in twenty-eight of the largest English towns. The lowest death-rates among the thirty Colonial and Foreign cities were 16·8 in Christiania, 22·7 in Geneva, 23·1 in Philadelphia, and 23·6 in Brooklyn; the rates ranged upwards in the other towns to 35·4 in Venice, 35·6 in Prague, 40·4 in Madras, and 40·9 in St. Petersburg. The deaths referred to small-pox in Paris, which had declined from 248 to 101 in the three preceding quarters, rose again to 154 in the first three months of this year; the deaths from measles and diphtheria also showed a considerable increase upon those returned in the previous quarter. The fatal cases of typhoid fever in Paris, which in the four quarters of 1882 had risen from 436 to 1571, declined last quarter to 582, and were equal to a rate of 1·04 per 1000, which, however, was more than four times as great as the death-rate from the same disease in London. The deaths referred to small-pox in St. Petersburg, which had been 173, 162, and 279 in the three preceding quarters, declined to 232 last quarter. In Baltimore small-pox was severely epidemic during the greater part of the quarter, and caused no fewer than 588 deaths, against numbers increasing from 45 to 374 in the three previous quarters. The 69 deaths from this disease in Rotterdam were more than double those returned in the last three months of 1882. Diphtheria caused 369 deaths in St. Petersburg, 570 in Berlin, 288 in New York, and 267 in Philadelphia. The 321 fatal cases of typhus and typhoid fever recorded in St. Petersburg showed a further increase upon the numbers returned in the two preceding quarters, and were equal to an annual rate of 1·39 per 1000, while in London the death-rate from these diseases last quarter did not exceed 0·25 per 1000. Typhoid fever also showed increased prevalence in Prague, Buda-Pesth, and Philadelphia.

PRELIMINARY TABLES.

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns which have been supplied by Mr. Richard Meade of the Mining Record Office.

592	Swansea - - - M -	88,069	874	448	40'2	20'6	1'2	120	{ Llangafelach, Swansea, and Llan- samlet Sub-districts.	

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

TABLE VIII.—LONDON—OUTER RING. **Population; Births; Deaths from All Causes, and from the principal Zymotic Diseases; and the Annual Rate of Mortality, during the First Quarter of 1883.**

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality for the above Table, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE IX.—Births and Deaths in the First Quarter of 1883, in 30 Foreign Cities having an estimated aggregate Population of 14,407,763 persons.

* The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with 11 Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

c See page 14, note b.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND. of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and in the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and of ENGLAND.

^a The Superintendent Registrars' Districts are collections of contiguous Parishes or Places, nearly always identical with the Poor Law Unions of the same names: they are now 630 in number, and are here arranged topographically under the Registration Counties.

^b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1871. They do not include space occupied by foreshore or tidal water of rivers and creeks.

^c See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

Superintendent Registrars' Districts.		Area in Statute Acres.	Enumerated Population, 1881 (unrevised).	Mar- riages Registered in Quarter ending 31 Dec. 1882.	Births Registered in Quarter ending 31 Mar. 1883.	Deaths Average in Quarters ending 31 Mar. in the 3 Years 1880-82.	The DEATHS in the Quarter are stated by the Registrars to include																			
							Deaths of Infants under 1 Year of Age. Persons aged 60 Years & upwards.		Deaths from									Inquest Cases.	Deaths in Public Institutions.							
									Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.

The Registration Sub-districts (213 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *H* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

For London, the numbers of Births and Deaths, as well as the deaths given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 21st March.

a 618 : 3.—Of the 18 deaths from measles, 14 occurred in Wrexham Urban Sanitary District.

b 630 : 2.—The 5 deaths from whooping-cough occurred in Abergele and Pensarn Urban Sanitary District.

c 627 : 1.—Of the 13 deaths from whooping-cough (10 of them registered in March), 7 occurred in the parish of Llanfyllin and 7 in the parish of Llandwrog.

d 627 : 2.—The 3 deaths from fever (typhoid) occurred in the parish of Llandeiniolen. The Registrar reports that, at the close of the quarter, 8 persons were suffering from the disease in the house in which the first of the 3 deaths occurred.

e 637 : 3.—Of the 30 deaths from whooping-cough, 29 occurred in Carnarvon Urban Sanitary District.

f 628 : 1.—Of the 24 deaths from whooping-cough, 23 occurred in the Rural Sanitary District.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING MARCH 31ST, 1883.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in January was warm, with frequent rain; the sky was mostly overcast. The atmospheric pressure was for a few days together above its average, then for a few days below; there were heavy storms from the 24th to the 28th days. Water was standing in all low places, and the land generally was saturated, and not workable.

The weather in February was mild throughout the month, with excessive rain during the first three weeks, causing heavy floods, and perfectly saturating the land. The atmospheric pressure was low during the first half of the month and high afterwards. The last week was fine and dry.

The weather in March from the 6th day was very cold throughout the month, with but little rain, but frequent falls of snow. The atmospheric pressure was above its average during the first week and afterwards below. The wind, which was frequently from the North-east and North-west, was dry and searching; under its influence the land dried rapidly enabling farming work to proceed satisfactorily.

The mean daily temperature of the air was above the average, with but few exceptions, from January 1st to March 5th, the average daily excess being $3^{\circ}6$. From March 6th to the end of the quarter the weather was cold, the average daily deficiency of temperature being $6^{\circ}4$.

The mean temperature of the air for January was $41^{\circ}2$, being $4^{\circ}7$ and $2^{\circ}8$ above the averages of 112 years and 42 years respectively; it was $0^{\circ}8$ higher than in 1882, $9^{\circ}6$ higher than in 1881, and $8^{\circ}0$ higher than in 1880. The following are the only instances back to 1771 when the mean temperature of January was as high as $41^{\circ}2$:

In 1796 it was $45^{\circ}3$	In 1852 it was $42^{\circ}0$	In 1873 it was $42^{\circ}1$
„ 1804 „ $43^{\circ}2$	„ 1853 „ $42^{\circ}4$	„ 1874 „ $41^{\circ}7$
„ 1834 „ $44^{\circ}4$	„ 1863 „ $41^{\circ}8$	„ 1875 „ $43^{\circ}4$
„ 1846 „ $43^{\circ}7$	„ 1866 „ $42^{\circ}6$	„ 1877 „ $42^{\circ}7$
„ 1851 „ $42^{\circ}9$	„ 1872 „ $41^{\circ}3$	

The mean temperature of the air for February was $42^{\circ}6$, being $3^{\circ}9$ and $3^{\circ}1$ above the averages of 112 years and 42 years respectively; it was $0^{\circ}8$, $3^{\circ}9$, and $0^{\circ}8$ higher than in 1882, 1881, and 1880 respectively. Back to 1771 there have only been 13 instances when the mean temperature of February was as high as $42^{\circ}6$, viz.:

In 1794 it was $44^{\circ}7$	In 1848 it was $43^{\circ}4$	In 1868 it was $43^{\circ}0$
„ 1809 „ $44^{\circ}1$	„ 1849 „ $43^{\circ}2$	„ 1869 „ $45^{\circ}3$
„ 1817 „ $42^{\circ}6$	„ 1850 „ $44^{\circ}7$	„ 1872 „ $44^{\circ}8$
„ 1822 „ $43^{\circ}3$	„ 1867 „ $44^{\circ}7$	„ 1877 „ $42^{\circ}6$
„ 1846 „ $43^{\circ}9$		

The mean temperature of the air for March was $36^{\circ}1$, being $5^{\circ}0$ and $5^{\circ}7$ below the averages of 112 years and 42 years respectively; it was $9^{\circ}9$, $6^{\circ}5$, and $8^{\circ}2$ lower than in 1882, 1881, and 1880, respectively. Back to 1771 there have only been six instances as cold as $36^{\circ}1$, viz.:

In 1785 it was $33^{\circ}9$	In 1789 it was $34^{\circ}4$	In 1837 it was $35^{\circ}8$
„ 1786 „ $34^{\circ}2$	„ 1814 „ $35^{\circ}1$	„ 1845 „ $35^{\circ}2$

The mean temperature of January and February was high, being $41^{\circ}9$. Back to 1771 there are only seven instances of so high a mean temperature for these two months, viz.:

In 1796 it was $42^{\circ}5$	In 1863 it was $42^{\circ}0$	In 1872 it was $43^{\circ}0$
„ 1834 „ $42^{\circ}3$	„ 1869 „ $43^{\circ}2$	„ 1877 „ $43^{\circ}1$
„ 1846 „ $43^{\circ}8$		

The mean temperature for the quarter was $40^{\circ}0$, being $1^{\circ}2$ above the average of 112 years and $0^{\circ}1$ above the average of 42 years.

The mean high day temperature of the air in January was $45^{\circ}4$, being $2^{\circ}5$ above the average of 42 years; in February it was $48^{\circ}5$, being $3^{\circ}0$ above the average, and in March was $44^{\circ}1$, being $6^{\circ}0$ below the average.

The mean low night temperature of the air was in January, $36^{\circ}3$, being $2^{\circ}8$ above the average of 42 years; in February it was $37^{\circ}2$, being $2^{\circ}8$ above its average; and in March it was $29^{\circ}3$, being $6^{\circ}0$ below the average. Therefore both the high day temperatures and low night temperatures in January and February were high, and in March were very low.

The mean daily range of temperature in January was $0^{\circ}5$ smaller than the average, in February was $0^{\circ}2$ greater than the average, and in March was $0^{\circ}1$ greater than the average.

The mean temperature of the air in January was $1^{\circ}1$ higher than in December, in February was $1^{\circ}4$ higher than in January, and in March was $6^{\circ}5$ lower than in February. (From the preceding 42 years observations the decrease of temperature from December to January is $1^{\circ}5$; the increase of temperature from January to February is $1^{\circ}1$, and from February to March is $2^{\circ}3$.)

From December to January there was an increase of temperature at stations south of 51° of $0^{\circ}7$, between 51° and 52° of $1^{\circ}5$, between 52° and 53° of $1^{\circ}6$, between 53° and 54° of $1^{\circ}9$, and between 54° and 55° of $2^{\circ}8$.

From January to February there was an increase of temperature south of 51° of $0^{\circ} \cdot 1$, between 51° and 52° of $2^{\circ} \cdot 0$, between 52° and 53° of $1^{\circ} \cdot 7$, between 53° and 54° of $2^{\circ} \cdot 6$, and between 54° and 55° of $2^{\circ} \cdot 0$.

From February to March there was a decrease of temperature south of 51° of $5^{\circ} \cdot 9$, between 51° and 52° of $6^{\circ} \cdot 5$, between 52° and 53° of $6^{\circ} \cdot 9$, between 53° and 54° of $6^{\circ} \cdot 6$, and between 54° and 55° of $6^{\circ} \cdot 1$.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and that the minus sign (−) signifies below the average.

The average duration of the different directions of the wind referred to eight points of the compass, and the duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JANUARY.			FEBRUARY.			MARCH.		
	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	1½	1½	0	1½	2	-½	9½	2½	+6½
N.	3	3	-2½	0	3	-3	2½	3½	-1½
N.E.	2	3½	-1½	4	3½	-1	8½	4	+4½
E.	10½	2½	+10	1	2	-1	2½	2½	0
S.E.	3	2½	+½	7½	1½	+6½	1½	2	-½
S.	3	4½	-1½	5	3	+2	0	2½	-2½
S.W.	9½	9½	0	8½	8	+½	1½	7½	-6
W.	3	3½	-½	3½	2½	+1	4½	3½	+1½
Calm.	0	2½	-2½	0	2½	-2½	0	2½	-2½

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of January are opposite to E. and S.E.; in February to S.E. and S.; and in March to N.W. and N.E.

The minus sign (−) denotes deficiencies below averages. In January the largest numbers are opposite to W. and N.; in February to N., N.E., and E.; and in March to S.W. and S.

About London the mean daily pressure of the atmosphere was below its average for the first two days, the deficiency being 0.24 in.; from the 3rd to the 8th it was above its average, the average daily excess being 0.34 in.; from the 9th to the 16th it was below, the average deficiency for these eight days being 0.33 in.; then from the 17th till the 24th it was above its average (the 22nd and 23rd being as much as 0.66 in. and 0.67 in. respectively above), and the daily excess was 0.40 ; from January 25th to February 3rd, there was a deficiency of 0.38 in. daily, this was followed by three days above the daily excess being 0.19 in.; from the 7th to the 14th there was a deficiency of 0.23 in. daily; from February 15th to March 6th there was a daily deficiency of 0.44 in.; and from this date to the end of the quarter there was a mean daily deficiency of 0.19 inch.

The mean reading of the barometer for the month of January at the height of 160 feet above the sea was 29.735 ins., being 0.017 in. below the average of 42 years; 0.450 in. below that of 1882; and 0.025 in. below that of 1881.

The mean reading of the barometer for the month of February was 29.904 ins., being 0.115 in. above the average of 42 years, 0.147 in. below that of 1882, and 0.243 in. above that of 1881.

The mean reading of the barometer for the month of March was 29.749 ins., being the same as the average of 42 years, 0.094 in. below that of 1882, and 0.021 in. above that of 1881.

(From the 42 preceding years observations the mean pressure in January is 0.036 in. less than in December; that in February is 0.037 in. above that in January, and that in March is 0.040 in. below that in February.)

From December to January there was an increase of pressure at stations south of 51° of 0.021 in.; between 51° and 52° of 0.22 in.; and between 52° and 53° of 0.23 in.; and between 53° and 54° of 0.20 in.; and north of 54° of 0.16 in.

From January to February there was a decrease of pressure upon extreme northern stations of 0.18 in. to extreme southern stations of 0.13 in.

From February to March between the stations Somerleyton and Truro, there was a deficiency of 0.13 in., from Wolverhampton to Hull there was a deficiency of 0.05 in., from Stonyhurst to Bradford of 0.01 in.; and from Lancaster to Carlisle a deficiency of 0.04 in.

Thunderstorms occurred in January on the 27th at Truro; and on the 29th at Cambridge. In February, on the 1st at Guernsey, Truro, Plymouth, and Torquay; and on the 2nd at Totnes.

Thunder was heard but lightning was not seen in February, on the 11th at Bradford; on the 13th at Carlisle; on the 15th at Stonyhurst; and on the 18th at Carlisle; and in March, on the 21st at Guernsey.

Lightning was seen but thunder was not heard in January, on the 10th at Carlisle, and on the 30th at Cambridge; and in March, on the 25th at Llandudno.

Solar halos were seen on January 14th and 15th at Oxford; on the 15th at Cardington; on the 23rd and 28th at Torquay; on the 28th at Oxford; and on the 31st at Oxford and Bermerside.

In February, on the 1st at Torquay; on the 5th at Guernsey and Oxford; on the 16th at Torquay, Oxford, and Stonyhurst; on the 18th and 19th at Torquay.

In March, on the 14th at Torquay; on the 16th at Torquay and Oxford; on the 19th at Torquay; on the 26th, 28th, and 29th at Halifax; and on the 31st at Guernsey.

Lunar halos were seen on the 13th at Lowestoft; on the 15th at Cambridge; on the 17th at Wolverhampton and Halifax; on the 18th and 19th at Oxford and Halifax; on the 20th at Wolverhampton; and on the 27th at Oxford.

In February on the 12th at Oxford and Cambridge; on the 14th at Oxford; on the 15th at Oxford, Cambridge, and Lowestoft; on the 16th at Oxford and Rugby; on the 17th at Oxford; and on the 19th at Salisbury, Barnet, Wolverhampton, Leicester, and Stonyhurst.

In March, on the 19th at Torquay; and on the 26th at Bermerside.

Aurora borealis was seen in February, on the 12th at Hull; and on the 24th at Cambridge.

In March on the 3rd and 10th at Oxford.

Snow fell in January on the 8th at Royston; on the 9th at Marlborough, Oxford, and Burslem; on the 15th at Cambridge; on the 23rd at Carlisle; on the 24th at Salisbury, Whitechurch, Barnet, Royston, Cambridge, and Wolverhampton; on the 25th at Cardington, Somerleyton, Wolverhampton, Bolton, Bermerside, and Bradford; on the 26th at Totnes, Torquay, Royston, Bolton, Bermerside, Hull, Bradford, and Leeds; on the 27th at Marlborough, Burslem, Royston, Cardington, Rugby, Lowestoft, Wolverhampton, Bermerside, Bradford, Leeds, and Lancaster; on the 28th at Bermerside and Carlisle; on the 29th at Burslem, Llandudno, Bolton, Halifax, and Carlisle; on the 30th at Torquay, Marlborough, Barnet, Burslem, Bermerside, and Bradford; on the 31st at Torquay.

In February, on the 1st at Wolverhampton, Llandudno, and Bolton; on the 2nd at Royston; on the 7th at Bradford; on the 11th at Oxford and Bradford; and on the 13th at Carlisle.

In March snow fell at every station on about five or six, at some places it fell on 12 days, falling all over the country at nearly the same time.

Hail fell on the 2nd January at Torquay and Salisbury; on the 9th at Guernsey; on the 23rd at Bolton; on the 24th at Truro, Salisbury, Royston, Leicester, and Bolton; on the 25th Salisbury and Marlborough; on the 26th at Guernsey, Totnes, Torquay, Ventnor, Osborne, Salisbury, Rugby, Lowestoft, Llandudno, Bermerside, and Carlisle; on the 27th at Guernsey, Salisbury, Oxford, Llandudno, and Bermerside; on the 28th at Bermerside; on the 30th at Plymouth, Marlborough, Burslem, Cardington, and Llandudno; and on the 31st at Totnes and Torquay.

In February, on the 1st at Torquay; on the 2nd at Truro; on the 3rd at Guernsey, Torquay, and Oxford; on the 11th at Guernsey, Oxford, Royston, and Stonyhurst; on the 12th at Guernsey, Torquay, and Stonyhurst; on the 13th at Torquay, Osborne, Blackheath, Llandudno, and Carlisle; on the 14th at Oxford; on the 15th at Guernsey, Blackheath, Oxford, Cambridge, Rugby, and Llandudno.

In March, on the 6th at Ventnor, Blackheath, Oxford, Royston, Lowestoft, Somerleyton, and Hull; on the 7th at Lowestoft, Somerleyton, and Hull; on the 8th, 9th, 10th, and 11th at Lowestoft and Somerleyton; on the 14th at Guernsey; on the 15th at Stockton; on the 16th at Llandudno, Bolton, and Stonyhurst; on the 17th at Guernsey, Truro, Plymouth, Torquay, Salisbury, Oxford, and Llandudno; on the 22nd at Hull; on the 24th at Bedford, Hull, and Stonyhurst; on the 25th at Bolton; on the 26th at Truro and Llandudno; on the 27th at Plymouth, Royston, Llandudno, and Hull.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING MARCH 31st, 1883.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.

Year 1883.	Month.	Pressure of Atmosphere in Month.	Temperature of Air in Month.				Mean Temperature.	Mean Temp-erature.	Vapour.	Mean Reading of Thermometer.	Wind.	Mean Amount of Ozone. The highest temperatures of the air were at Carlisle, 59°·3; at Barnstaple, 59°; and at Osborne, Salisbury, Nottingham, and Leeds, 58°.

The lowest temperatures of the air were at Rugby and Hull, 10°; at Carlisle, 13°·7; and at Stratford Turgiss, 13°·8.

The greatest ranges of temperature were at Salisbury, 17°; at Rugby, 14°·2; and at Stratford Turgiss and Barnet, 14°.

The least daily ranges of temperature were at Guernsey, 8°·7; at Liverpool, 8°·8; and at Bradford, 9°·3.

The greatest number of days of rain were at Burslem, 61; at Salisbury and Bolton, 59; and at Guernsey, 58.

The least number of days of rain were at Carlisle, 35; at Holkham, 37; and at Wolverhampton, 42.

The greatest falls of rain were at Totnes, 14·95 inches; at Truro, 13·21 inches; and at Bolton, 11·64 inches.

The least falls of rain were at Cambridge, 4·08 inches; at Blackheath, 5·12 inches; and at Greenwich, 5·36 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.										WIND.				RAIN.

QUARTERLY RETURN
OF
MARRIAGES, BIRTHS, AND DEATHS
REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF
ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 138.]

Marriages—*January, February, March, 1883.*
Births and Deaths—*April, May, June, 1883.*

[Price 9d.]

*General Register Office, Somerset House,
31st July, 1883.*

The resident POPULATION of the UNITED KINGDOM in the middle of 1883 is estimated at 35,631,290 persons; that of England and Wales at 26,762,974, of Scotland at 3,825,744, and of Ireland at 5,042,572.

In the United Kingdom the *births* of 293,074 children, and the *deaths* of 181,453 persons, were registered in the three months ending 30th June 1883. The recorded natural increase of population was thus 111,621. The registered number of persons married in the quarter ending 31st March 1883 was 114,266.

The birth-rate in the United Kingdom in the second quarter of 1883 was 33·0 per 1000, and the death-rate 20·4. The marriage-rate in the first quarter of 1883 was 13·0 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars General of those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2157 registration sub-districts of England and Wales during the quarter ending 30th June 1883; and the MARRIAGES in 14,629 churches or chapels, in 9042 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 31st March 1883.

Marriages.

During the three months ending March last, the marriages of 87,830 persons were registered in England and Wales, corresponding to an annual rate of 13·3 per 1000 of the estimated population in the middle of this year. This marriage rate showed a marked increase upon that recorded in recent corresponding quarters, and was 0·2 above the mean rate in the first quarters of the ten years 1873–82. The rate which was equal to 14·3 per 1000 in the first quarter of 1875 steadily declined to 11·5 in the three months ending March 1879, when the marriage-rate was most depressed; since 1879 the rate has more or less steadily recovered, and that recorded in the first quarter of this year exceeded the rate in the corresponding period of any year since 1876. The annual marriage-rate in the first quarter of this year ranged

in the several counties from 7·7 in Herefordshire, 8·1 in Rutlandshire, and 8·4 in Hertfordshire, to 15·9 in Northumberland, 16·0 in Durham, and 16·3 in Nottinghamshire. Compared with the rates in recent corresponding quarters, those recorded in the quarter under notice showed a general increase, which was especially marked in Dorsetshire, Staffordshire, Leicestershire, Nottinghamshire, and Derbyshire.

Births.

The births registered in England and Wales during the three months ending June last were 228,703, showing an increase of 1274 upon the number returned in the corresponding period of 1882. The annual birth-rate was equal to 34·3 per 1000 of the estimated population, was 1·6 below the mean rate in the ten preceding corresponding quarters, and showed a further decline from the rates recorded in recent corresponding quarters. So low a birth-rate has not been recorded in the first quarter of any year since 1869. The lowest county birth-rates last quarter were 27·8 in Herefordshire, 28·8 in Devonshire, and 29·1 in Dorsetshire; the highest rates were 38·9 in Nottinghamshire, 39·2 in Staffordshire, and 40·7 in Durham.

In the twenty-eight great towns the birth-rate last quarter averaged 35·2 per 1000, and was 0·9 above the general English rate. The rate, which did not exceed 34·2 in London, averaged 36·1 in the twenty-seven provincial towns. In these provincial towns the rates ranged from 27·7 in Huddersfield and 30·2 both in Plymouth and in Halifax, to 38·9 in Leicester, 40·5 in Blackburn, 41·3 in Nottingham, and 42·3 in Sunderland. In fifty other large town districts the average birth-rate was 35·8, and 0·6 above the mean rate in the larger towns; while the rates did not exceed 23·3 in Bath, 24·0 in Hastings, and 26·2 in Cheltenham, they ranged upwards to 44·5 in Wigan, 44·9 in Stoke-upon-Trent, and 46·4 in Middlesbrough.

Movement of the Population.

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 104,492 and 102,351 in the second or June quarters of 1881 and 1882, declined to 94,920 last quarter. It appears from returns issued by the Board of Trade that 174,282 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 598 whose nationality was undistinguished, and excluding 39,575 foreigners, 134,707 were emigrants of British origin, including 60,198 English, 11,781 Scotch, and 62,728 Irish; the numbers of British emigrants in the three preceding corresponding quarters were 89,967, 88,167, and 107,763, respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 2249 from England, 3079 from Scotland, and 12,440 from Ireland. Compared with the corresponding period of 1882, the proportion of emigrants last quarter showed a very large increase in Ireland, whereas the English and Scotch proportions differed but slightly.

Prices and Pauperism.

The average price of wheat during the three months ending June was 42s. 8d., and showed an increase of 1s. 5d. upon that which prevailed in the preceding quarter; it was, however, lower than the mean price in the second quarter of any year since 1879, when it was 41s. 2d. The mean wholesale price of beef and of mutton last quarter was 6½d. and 7½d., per lb. respectively; the mean price of beef was 1½d., and that of mutton ¾d., below the mean prices prevailing in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 16s. 9d. per ton, 3d. above the mean price in the preceding quarter, and 2s. above that which prevailed in the second

quarter of last year. The mean price of Consols was 102 $\frac{1}{4}$ l. and was 2s. 6d. above the mean price in the preceding three months. The minimum annual rate of discount charged at the Bank of England, which had been reduced to 3 per cent. on 1st March last, was raised to 4 per cent. on 10th May, and so remained until the end of the quarter.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 710,353, of whom 172,858 received in-door and 537,495 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending June last was equal to 26·5 per 1000, against 28·1 and 27·0 in the two preceding corresponding quarters; in the spring quarter of 1870 the proportion of paupers was 43·1 per 1000. Compared with the second quarter of 1882 the proportion of pauperism in the three months ending June last showed a decline of 1·9 per cent. During last quarter 24·3 per cent. of the total paupers were in receipt of in-door relief, whereas in the corresponding period of 1865 the proportion of in-door to total paupers did not exceed 14·0 per cent.

Meteorology.

The remarks upon the Meteorology of the quarter, at the Royal Observatory, Greenwich, and at other stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found, with accompanying Tables on pp. 65-72. The mean reading of the barometer during the quarter was 29·801 and was 0·019 above the mean reading for the corresponding periods in 42 years, the reading showed a considerable excess in April, whereas it was below the average both in May and June. The mean temperature of the air in the quarter was 53°·0, and was 0°·7 above the average for the corresponding period of 112 years. The monthly mean temperature was slightly below the average in April, whereas it showed a slight excess both in May and June. At 37 stations of observation the mean temperature of the quarter ranged from 48°·7 at Wolverhampton and 48°·8 at Silloth, to 53°·2 at Camden Square (London) and 54°·2 at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 4·75 inches, and was 1·08 inches below the average amount in the corresponding periods of 67 years. The rainfall was equal to 1·70 inches in April, 1·71 inches in May, and 1·34 inches in June; the amount was below the average in each of the three months. At 37 stations of observation the recorded rainfall ranged from 3·83 inches at Liverpool, to 8·32 inches at Leicester, 8·38 inches at Royston, 8·39 inches at Stonyhurst, and 8·61 inches at Cambridge.

The number of hours of bright sunshine recorded at Greenwich during the quarter was 474·6, and was 4·5 above the average number recorded in the six preceding corresponding periods.

State of the Public Health; Deaths.

During last quarter 133,783 deaths were registered in England and Wales, and were equal to an annual rate of 20·1 per 1000 of the estimated population. This death-rate was 0·3 below the average rate in the ten preceding corresponding quarters, but exceeded by 1·5 and 1·1, respectively, the exceptionally low rates in the second quarters of 1881 and 1882. The increase in the death-rate would appear to have been due to the unseasonably low temperature that prevailed during March, rather than to the prevalence of a lower sanitary condition, inasmuch as the death-rate from zymotic diseases was exceptionally low.

The death-rates in the English counties last quarter ranged from 15·9 in the extra-metropolitan portion of Surrey, 16·8 in Rutlandshire, and 17·0 in Berkshire, to 22·1 in Lancashire, 22·6 in Huntingdonshire, and 23·5 in Monmouthshire. Compared with the county rates in the second quarter of 1882, the rates last quarter showed a proportionally large excess in Monmouthshire, Cornwall, Bedfordshire, Hertfordshire, and Huntingdonshire.

The 133,783 deaths registered during the quarter included 69,663 of males, and 64,120 of females; the annual death-rate among males was 21·5, and among females but 18·7, per 1000 estimated to be living of each sex. In equal numbers living, the deaths of males were 115 to 100 of females, whereas in the corresponding quarter of 1882 the proportion of male mortality was as 113 to 100 of female mortality. The relative excess of male mortality last quarter was, therefore, exceptionally large.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of rather more than sixteen millions of persons, the death-rate was equal to 20·8 per 1000; in the remaining and chiefly rural population of over ten and a half millions of persons, the rate did not exceed 19·0. The urban rate was 0·6 below, while the rural rate corresponded with, the average rate in the ten preceding corresponding quarters. The urban rate exceeded by 0·6, and the rural rate by 1·8, the low rate that prevailed in the corresponding quarter of last year. In equal numbers living the deaths were 109 in the urban to 100 in the rural population, against an average proportion of 113 to 100 in the ten preceding corresponding quarters. The relative excess of urban mortality last quarter was, therefore, considerably below the average.

In the twenty-eight great towns, including London, and having an estimated population (in the middle of this year) of more than eight and a half millions of persons, the death-rate was equal to 21·5, and was only 0·7 above the general urban rate. The death-rate did not exceed 20·5 in London, whereas it averaged 22·3 in the twenty-seven provincial towns, among which it ranged from 17·4 and 17·8 in Bristol and Bradford, to 25·3 in Blackburn, 25·7 in Hull, 26·6 in Liverpool, and 27·5 in Manchester. In fifty other large town districts, with an aggregate population estimated at rather more than two and a half millions of persons, the mean death-rate was 20·5, and 1·0 below the mean rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 15·0 in Barrow-in-Furness, 15·6 in Oxford, 15·9 in Reading, and 16·0 in Gloucester; the highest rates were 24·3 in Macclesfield, 25·7 in Southampton, 25·8 in Stockport, and 26·2 in Stoke-upon-Trent.

MORTALITY AT DIFFERENT AGES.—The 133,783 deaths last quarter included 28,802 of infants under one year of age, 68,425 of children and adults aged between one and 60 years, and 36,556 of persons aged upwards of 60 years.

The rate of infant mortality, measured by the proportion of deaths under one year of age to births registered, was equal to 126 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality averaged 129 per 1000, and ranged from 139 in 1875 to 121 in 1881. The county rates of infant mortality last quarter ranged from 88 in Berkshire, 93 in Oxfordshire, and 94 in the extra-metropolitan portion of Kent, to 141 in Lancashire, 146 in Staffordshire, 147 in Leicestershire, and 151 in the East Riding of Yorkshire. In the twenty-eight great towns the proportion of infant mortality averaged 136 per 1000, and exceeded the general English rate by 10. The rate did not exceed 128 in London, while it averaged 142 in the twenty-seven provincial towns, among which it ranged from 96 and 112 in Brighton and Bristol, to 168 and 174 in Hull and in Huddersfield. In the fifty other town districts infant mortality averaged 131 per 1000 births; the lowest proportions were 69 in Colchester, 79 in Maidstone, and 82 in Cambridge, while they ranged in the other towns to 187 in Exeter, 188 in West Bromwich, and 190 in Macclesfield.

The annual rate of mortality among persons aged between one and 60 years was equal to 11·5 per 1000 persons estimated to be living at these ages, against an average of 11·8 in the ten preceding corresponding quarters. In the twenty-eight great towns the death-rate at these ages averaged 13·3 per 1000, ranging from 9·8 both in Bristol and in Leicester, to 18·1 and 18·5 in Liverpool and Manchester respectively.

Among persons aged upwards of 60 years the annual death-rate averaged 73·3 per 1000, and was 3·5 above the mean rate at these ages in the second quarters of the ten years 1873-82. In the twenty-eight great towns the death-rate at these ages averaged 77·8 per 1000, and was 4·5 above the general English rate. In London it was equal to 74·4, while it averaged 80·9 in the twenty-seven provincial towns, and ranged from 65·1 and 65·6 in Norwich and Portsmouth, to 97·6 in Halifax, 98·9 in Manchester, and 99·0 in Huddersfield.

The rate of mortality at all ages last quarter was 1·5 per cent. below the mean rate in the ten preceding corresponding quarters; the decline was equal to 2·3 per cent. among infants under one year of age, and to 3·4 per cent., among children and adults aged between one and 60 years; whereas among persons aged upwards of 60 years there was an excess in the death-rate equal to 5·0 per cent.

ZYMOTIC DISEASES.—The 133,783 deaths from all causes included—

2815	attributed to whooping-cough.
2582	measles.
2452	scarlet fever.
1905	diarrhœa.
1793	fever.
861	diphtheria.
224	small-pox.

Thus the total number of deaths ascribed to these causes was 12,632, equal to an annual rate of 1·89 per 1000, which was 0·51 below the average rate in the ten preceding corresponding quarters. The zymotic rate last quarter was lower than that recorded in the second quarter of any year since 1870, except in 1881, when the rate was only 1·87.

The lowest county rates from these diseases last quarter were 0·79 in Wiltshire, 0·82 in Norfolk, and 0·88 in Westmorland; the highest were 2·33 in Northumberland, 2·57 in Durham, and 3·06 in Monmouthshire. In the twenty-eight great towns the rate averaged 2·28, ranging from 0·57 and 0·67 in Huddersfield and Norwich, to 3·32 in Hull, 4·01 in Sheffield, and 4·45 in Liverpool. In fifty other considerable towns the rate averaged 2·01, and ranged upwards to 3·77 in Rotherham, 3·79 in Gateshead, 3·82 in Ystradyfodwg, and 7·52 in Southampton.

The deaths from *whooping-cough* were 2815, and equal to an annual rate of 0·42 per 1000, the average rate in the ten preceding corresponding quarters being 0·54.

Only one death from this disease was registered in Bedfordshire, and 2 in Rutlandshire, whereas the rate was equal to 0·98 in Suffolk, and 1·09 in the East Riding of Yorkshire. In the twenty-eight great towns the rate averaged 0·49, ranging from 0·11 in Halifax and 0·13 in Sunderland, to 1·02 in Manchester, 1·28 in Plymouth, and 1·94 in Hull. In fifty other considerable towns the rate averaged 0·42, the highest rates being 1·44 in Cheltenham, 1·61 in Stockport, and 2·10 in Burton-upon-Trent. The mortality from this disease was also excessive in Folkestone, Stradbroke, Needham Market, Castleford, Brecknock, and Bangor sub-districts.

The deaths from *measles* were 2582, and equal to an annual rate of 0·39 per 1000, the average rate in the ten preceding corresponding quarters being 0·42.

No death from this disease was registered in Huntingdonshire, Rutlandshire, Norfolk, or Dorsetshire, whereas the rate was equal 0·95 in Cumberland, and 1·11 in Monmouthshire. In the twenty-eight great towns the rate averaged 0·59; no death from this disease was recorded in Norwich, Wolverhampton, Derby, Blackburn, Preston, Halifax, or Cardiff, while the highest rates were 0·94 in Sheffield, 1·07 in Newcastle-upon-Tyne, and 1·59 in Liverpool. In fifty other considerable towns the rate averaged 0·47, the highest rates being 2·19 in Swansea, 2·35 in Ystradyfodwg, and 5·97 in Southampton. The mortality from this disease was also excessive in Loughborough, Egremont, Aberystwith, Pontypool, Holywell, and Llanllechid sub-districts.

The deaths from *scarlet-fever* were 2452, and equal to an annual rate of 0·37 per 1000, the average rate in the ten preceding corresponding quarters being 0·54.

No death was referred to this disease in Huntingdonshire, and the rate did not exceed 0·05 in Sussex, Hampshire, or Devonshire, whereas it ranged upwards to 0·89 in Lincolnshire, 0·93 in Cornwall, and 1·23 in Herefordshire. In the twenty-eight great towns the rate averaged 0·43; no death from this cause was registered in Plymouth, whereas the rate was equal to 1·39 in Leeds and 2·02 in Sheffield. In fifty other considerable towns the rate averaged 0·34, and ranged upwards to 0·98 in Carlisle, 0·99 in Tynemouth, 1·00 in Warrington, and 1·41 in Rotherham. The mortality from this disease was also excessive in Ware, Peterborough, Camborne, Ross, Stourbridge, Eckington, and Morpeth sub-districts.

The deaths attributed to *diarrhœa* were 1905, and equal to an annual rate of 0·28 per 1000, the average rate in the ten preceding corresponding quarters being 0·35. The highest county rates were 0·40 in Staffordshire, 0·42 in Lancashire, and 0·52 in Rutlandshire. In the twenty-eight great towns the rate averaged 0·31, and was highest 0·55 in Bolton, and 0·85 in Preston. In fifty other considerable towns the rate averaged 0·33.

The deaths from *fever*, including typhus, enteric fever, and simple continued and ill-defined forms of fever, were 1793, and equal to an annual rate of 0·27 per 1000, the average rate in the ten preceding corresponding quarters being 0·35. The death-rate from these causes corresponded with that which prevailed in the second quarter of 1882, but slightly exceeded the rates in the corresponding period either of 1880 or 1881.

The lowest death-rates from "fever" were 0·08 and 0·10 in Buckinghamshire and Herefordshire; the rates ranged upwards in the other counties, however, to 0·46 both in Lancashire and in Northumberland, and 0·48 in Durham. In the twenty-eight great towns the rate averaged 0·28, and scarcely exceeded the general English rate; it ranged from 0·05 and 0·06 in Huddersfield and Leicester, to 0·76 in Sunderland, 0·87 in Liverpool, and 1·04 in Portsmouth. In fifty other considerable towns the rate averaged 0·32, and ranged upwards to 0·89 in Rotherham, 0·95 in Ystradyfodwg, and 1·24 in Barrow-in-Furness.

The deaths attributed to *diphtheria* were 861, and equal to an annual rate of 0·13 per 1000, the average rate in the ten preceding corresponding quarters being only 0·10. No death was referred to this cause either in Rutlandshire or in Cumberland, whereas the rate was equal to 0·36 in Bedfordshire, 0·44 in Essex, and 0·62 in Huntingdonshire. In the twenty-eight great towns the rate averaged 0·14. No death was referred to this disease in Wolverhampton, Leicester, Birkenhead, Blackburn, Huddersfield, or Halifax; whereas the highest rates were 0·22 and 0·27 in London and Cardiff. In fifty other considerable towns the rate averaged only 0·06, being less than half the rate in the twenty-eight larger towns; the highest rates were 0·39 in Shrewsbury, and 0·43 in Reading. The mortality from this disease also showed an excess in Huntingdon, Dunmow, Hatfield (Essex), and Ross sub-districts.

The deaths from *small-pox* numbered 224, and were equal to an annual rate of 0·03 per 1000, the average rate in the ten preceding corresponding quarters being 0·10. The deaths from this cause which had been 209, 190, and 269 in the three preceding quarters, again showed a decline last quarter. Of the 224 deaths, 30 occurred in London and its outer ring of suburban districts, besides 14 in the home and eastern counties; 51 in Staffordshire (including 18 in West Bromwich), 9 in Birmingham, 13 in Lancashire, 8 in Leeds, 45 in Durham, and 23 in Newcastle-upon-Tyne.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in fifty other large town districts, and in the remaining, or comparatively rural part, of England and Wales:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Second Quarter of 1883.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.
Cols.	1.	2.	3.	4.	5.	6.	7.	8.
England and Wales -	1·89	0·03	0·39	0·37	0·13	0·42	0·27	0·28
28 Great Towns -	2·23	0·04	0·59	0·43	0·14	0·49	0·28	0·31
50 other Towns -	2·01	0·07	0·47	0·34	0·06	0·42	0·32	0·33
England and Wales, less the 78 Towns -	1·66	0·03	0·26	0·34	0·14	0·38	0·25	0·26

Watering-Places and Summer Resorts.

The statistics of mortality for the three months ending June are given (Table VIII.) as usual for forty-six of the English holiday and health resorts. The mortality given is not always that of the actual watering place itself, but in many cases that of a district or sub-district in which a watering-place is situated. As a rule the death-rate in a watering-place is likely to be slightly higher than in the whole district or sub-district, the watering-place being more urban in character than the surrounding country; but occasionally the reverse may be the case. This, however, though doubtless a matter of interest to the Sanitary Authorities severally intrusted with the care of a watering-place, and of the district outside its limits, is of comparatively little importance to the holiday visitor, who by no means confines himself within the arbitrary boundary of the place wherein he sleeps.

The mean annual death-rate in the forty-six health-resorts during last quarter was 17·9, and the zymotic rate 1·28 per 1000. These rates contrast favourably not only with those for all England and Wales, which were 20·1 and 18·9 respectively, but also with those of the rural districts generally. The rates last quarter in England and Wales, exclusive of the seventy-eight chief towns or urban districts, were 19·2 from all causes, and 1·7 from the principal zymotic diseases.

It is but just to these health-resorts to note that their death-rates are, doubtlessly, in some degree higher than they would otherwise be, owing to the very fact of their being health-resorts; of their being, that is, places to which persons in weak health flock in considerable numbers in the hope of receiving benefit. This, however, affects the general death-rate much more than the death-rate from zymotic diseases.

The zymotic death-rate, that is, the annual rate of mortality per 1000 from the principal zymotic diseases, was 0·00 in Deal and Walmer, Littlehampton, Bognor, Tenby, and Harrogate. It was under 1·00 per 1000 in Whitby, Yarmouth, Southend, Herne Bay, Margate, Dover, Hastings and St. Leonards, Eastbourne and Seaford, Brighton, Exmouth, Teignmouth and Dawlish, Torquay, Ilfracombe, Beaumaris, Llandudno, Rhyl, Southport, Blackpool and Fleetwood, Clifton, Malvern, Leamington, and Buxton. In Lowestoft, however, it was 2·23, mainly owing to measles; in Ramsgate 2·24, chiefly from "fever"; in Folkestone 4·95, in Aberystwith 3·11, and in Bangor 8·48, in each case mainly due to the mortality from whooping-cough. In the remainder of the forty-six watering-places the zymotic death-rate was over 1·00, and under 2·00.

CERTIFICATION OF CAUSES OF DEATH.—The causes of 121,562, or 90·8 per cent. of the 133,783 deaths registered in England and Wales during last quarter, were certified by registered medical practitioners in attendance during the last illness of deceased persons, and 6918 or 5·2 per cent. by coroners in inquest

cases. The causes of the remaining 53·03 or 4·0 per cent. of the deaths were uncertified; each of these proportions showed a slight decline from those prevailing in recent quarters. The proportion of uncertified deaths did not exceed 1·1 per cent. in London, whereas it averaged 4·5 in the rest of England and Wales. In the various counties the proportion of uncertified deaths ranged from 1·4 in the extra-metropolitan portion of Middlesex and in Berkshire, and 1·7 in the extra-metropolitan portion of Surrey, to 6·2 in Cornwall, 6·5 in Herefordshire, and 7·7 in Durham. In Wales 11·2 per cent. of the causes of death were uncertified, the proportion being equal to 11·1 in South Wales, and 11·4 in North Wales.

In the twenty-eight great towns the proportion of uncertified deaths averaged 2·6 per cent.; as above-mentioned it did not exceed 1·1 in London, whereas it averaged 3·7 in the twenty-seven provincial towns, among which it ranged from 0·5 and 1·2 in Portsmouth and Birmingham, to 6·1 in Hull, 6·2 in Oldham, and 9·8 in Halifax. Excessive proportions of uncertified deaths have almost invariably been recorded in Oldham and Halifax in recent quarters.

VIOLENT DEATHS.—The deaths referred to different forms of violence were 4173; they were equal to an annual rate of 0·63 per 1000 of the estimated population, and to 3·1 per cent. of the total deaths. The death-rate from violence ranged in the several counties from 0·31 in Herefordshire, 0·35 in Rutlandshire, and 0·37 in Dorsetshire, to 0·77 in Northumberland, 0·78 in Cheshire, and 1·05 in Monmouthshire. In the twenty-eight great towns the deaths from violence were equal to an annual rate of 0·74 per 1000; in the several towns the rates ranged from 0·27 and 0·30 in Norwich and Oldham, to 1·03 both in Liverpool and in Sunderland, and 1·11 in Cardiff.

INQUESTS.—During the quarter 6918 inquest cases were registered, equal to 5·2 per cent. of the total deaths, exceeding by 0·1 the mean proportion in the ten preceding corresponding quarters. In the twenty-eight towns the proportion of inquests averaged 6·5 per cent.; it was but 1·9 and 2·4 in Oldham and Preston, whereas it ranged upwards to 9·9 in Cardiff, 10·1 in Leicester, and 11·5 in Derby.

DEATHS IN PUBLIC INSTITUTIONS.—The deaths recorded during the quarter in workhouses, in hospitals, and in public lunatic asylums were 14,715, and equal to 11·0 per cent. of the total deaths; exceeding by 1·2 the mean per-centage in the corresponding quarters of the ten years 1873–82. In the twenty-eight towns 7714, or 16·7 per cent. were registered in the principal public institutions. The per-centage of these deaths did not exceed 6·4 in Norwich and 7·5 both in Bradford and in Oldham, whereas it ranged upwards in the other towns to 16·3 in Bristol, 17·5 in Liverpool, 21·5 in Manchester, and 22·2 per cent. in Wolverhampton. In the rest of England and Wales the proportion of deaths in institutions did not exceed 8·0 per cent., against 16·7 in the twenty-eight great towns.

HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending June in 27 Colonial and Foreign cities, having an aggregate population of nearly fourteen millions of persons, was equal to 29·1 per 1000. The average rate in the twenty-one European cities was 30·5 per 1000, against 21·5 in twenty-eight of the largest English towns. The lowest death-rates among the twenty-seven Colonial and Foreign cities were 16·3 in Christiania, 20·7 in Baltimore, 21·9 in Philadelphia, and 22·1 in Brooklyn; the rates ranged upwards in the other towns to 35·1 in Munich, 36·3 in Buda-Pesth, 36·4 in St. Petersburg, and 42·4 in Prague. The fatal cases of small-pox in Paris, which had been 101 and 154 in the two preceding quarters, further rose to 181 in the second quarter of this year; the deaths from measles also showed a considerable further increase

upon the numbers returned in recent quarters. The deaths referred to typhoid fever in Paris, which had been 1571 and 582 in the two previous quarters, further fell to 523 last quarter, which were, however, equal to an annual rate of 0·94 per 1000, against but 0·14 from the same disease in London. The fatal cases of small-pox in St. Petersburg, which in the two preceding quarters had been 279 and 232, further declined to 129. In Bombay, Madras, and Rotterdam small-pox was severely epidemic during the quarter. Diphtheria caused 486 deaths in Berlin, 306 in St. Petersburg, 253 in New York, and 218 in Philadelphia. The fatal cases of measles in Berlin, which had been but 26 and 58 in the two preceding quarters rose to 636 in the quarter under notice. Measles also showed increased prevalence in St. Petersburg, Munich, Prague, and New York. The 356 deaths referred to typhus and typhoid fever recorded in St. Petersburg showed a further increase upon the numbers returned in the two previous quarters, and were equal to an annual rate of 1·54 per 1000, while in London the death-rate from these diseases last quarter did not exceed 0·15 per 1000. Typhoid fever was also fatally prevalent in Buda-Pesth, New York, and Philadelphia.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1873-83**, and in each Quarter of those Years.

YEARS -	1873	1874	1875	1876	1877	1878	1879	1880	1881	1882	1883
Marriages -	205,815	202,010	201,212	201,874	194,352	190,054	182,082	191,965	197,290	203,905	—
Births -	829,778	854,936	850,607	887,968	888,800	891,906	880,389	881,618	883,642	888,940	—

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns which have been supplied by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp't D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

TABLE VIII.—Mortality in Districts or Sub-districts containing the principal English Watering Places during the Second or Spring Quarter of 1883.

WATERING PLACES.	AREA in Acres.	ESTIMATED POPULATION in the middle of the Year 1883.	DEATHS registered in the Quarter ending 30th June 1883.	DEATHS from								ANNUAL DEATH-RATE per 1000 living.		DISTRICTS and SUB-DISTRICTS taken as approximately representing the Watering Places.

The figures for Folkestone relate only to the civil population. The population of Shorncliffe Camp and the deaths occurring therein have been excluded.
The rates of mortality for these towns have been corrected by the exclusion of deaths occurring in County Hospitals and Asylums situate within the districts or sub-districts taken to represent the watering places, or by the exclusion or addition of a portion of the deaths in Union Workhouses in cases where a portion of the Union only is embraced by the area taken, where the Workhouse is situate outside that area.

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality for the above Table, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE X.—**Births and Deaths in the Second Quarter of 1883, in 27 Foreign Cities having an estimated aggregate Population of 13,534,958 persons.**

* The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

† The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

‡ See page 14, note.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

a The Superintendent Registrars' Districts are collections of contiguous Parishes or Places, nearly always identical with the Poor Law Unions of the same names; they are now 630 in number, and are here arranged topographically under the Registration Counties.

b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks. c See page 14, note b.

II.—SOUTH EASTERN COUNTIES.—SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

Superintendent Registrars' Districts.		Area in Statute Acres.	Enumerated Population, 1881 (revised).	Marriages Registered in Quarter ending 31 Mar. 1883.	Births Registered in Quarter ending 30 June 1883.	Deaths	The DEATHS in the Quarter are stated by the Registrars to include													
							Deaths of	Deaths from												
							Infants under 1 Year of Age.	Persons aged 60 Years & upwards.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.	Inquest Cases.	Deaths in Public Institutions.

* The Registration Sub-districts (2137 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

^b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 30th June.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

Registration Sub-districts.		Area in Statute Acres.	Enumerated Population, 1881 (revised).	Births		Deaths		The DEATHS in the Quarter are stated by the Registrars to include													
				Registered in the Quarter ending 30 June 1883.	Average in Quarters ending 30 June in the 3 Years 1880-82.	Registered in the Quarter ending 30 June 1883.	Deaths of	Deaths from											Inquest Cases.	Deaths in Public Institutions.	
								Infants under 1 Year of Age.	Persons aged 60 Years & upwards.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING JUNE 30TH, 1883.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in April:—At the beginning of the month there were a few fine warm days, but from the 9th to the 25th the weather was cold and ungenial, snow fell generally on several days. The days were frequently bright, and the nights cold; but on the whole the month was dry, no rain falling at the beginning of the month and but little afterwards, being favourable for farming operations. The month was free from thunderstorms.

The weather in May:—The first twelve days were cold and rain or snow fell on several days at stations north of 51° . From the 12th the weather was warm and pleasant and at times hot; this fine weather continued to the end of the month. The fall of rain was generally below the average. Thunderstorms occurred on six days.

The weather in June was variable; at the beginning of the month it was warm and fine, then for a few days it was cold and warm alternately, it was very cold from the 15th to the 22nd, and unsettled afterwards to the end of the month. The fall of rain was generally below its average, on the whole the month was favourable for vegetation and farming work. Thunderstorms occurred on ten days.

About London the mean daily temperature of the air was above its average till the 8th day, and the mean daily excess of these 8 days was $3^{\circ}8$; it was generally below its average from the 9th to the 26th, the average daily deficiency of these 18 days being $1^{\circ}7$; from April 27th to May 1st it was slightly warmer, the mean daily excess being $1^{\circ}6$; the first 11 days in May were cold, and the average daily deficiency of mean temperature was $6^{\circ}1$; a warmer period set in on the 13th of May and continued with few exceptions to June 14th, the mean daily excess of these 33 days was $2^{\circ}4$; from the 15th of June till the 22nd the weather was very cold, the average daily deficiency of mean temperature being $5^{\circ}2$; from the 23rd to the 25th it was warmer, being $1^{\circ}9$ above the average; from June 26th to the 28th it was $4^{\circ}0$ below the average; and the three days at the end of the quarter were warm, being $6^{\circ}4$ above the average.

The mean temperature of the air for April was $46^{\circ}8$ being $0^{\circ}7$ above the averages of 112 years, and $0^{\circ}3$ below the average of 42 years, it was $1^{\circ}1$ lower than in 1882, $0^{\circ}9$ higher than in 1881, and $0^{\circ}3$ lower than in 1880.

The mean temperature for May was $53^{\circ}1$, being $0^{\circ}6$ and $0^{\circ}4$ above the averages of 112 years and 42 years; it was $1^{\circ}4$ and $1^{\circ}0$ lower than in 1882 and 1881 respectively, and $0^{\circ}5$ higher than in 1880.

The mean temperature for June was $59^{\circ}0$ being $0^{\circ}8$ and $0^{\circ}1$ above the averages of 112 years and 42 years respectively; it was $2^{\circ}5$, $0^{\circ}3$ and $1^{\circ}5$ higher than in 1882, 1881, and 1880 respectively.

The mean temperature for the quarter was $53^{\circ}0$, being $0^{\circ}7$ and $0^{\circ}1$ above the averages of 112 years and 42 years respectively.

The mean high day temperature of the air in April was $57^{\circ}6$, being the same as the average of 42 years; in May it was $63^{\circ}7$, being $0^{\circ}5$ lower than the average, and in June was $70^{\circ}8$, being $0^{\circ}1$ below the average.

The mean low night temperature of the air in April was $37^{\circ}4$, being $1^{\circ}8$ below the average of 42 years; in May it was $43^{\circ}5$, being $0^{\circ}2$ below the average; and in June it was $48^{\circ}9$, being $1^{\circ}0$ below the average.

The mean daily range of temperature in April was $1^{\circ}8$ higher than the average, in May it was $0^{\circ}3$ lower than the average, and in June it was $1^{\circ}0$ higher than the average.

The mean temperature of the air in April was $10^{\circ}7$ higher than in March; in May it was $6^{\circ}3$ higher than April, and in June it was $5^{\circ}9$ higher than in May.

(From the preceding 42 years' observations the increase of temperature from March to April is $5^{\circ}3$; the increase of temperature from April to May is $5^{\circ}6$, and the increase from May to June is $6^{\circ}2$.)

From March to April there was an increase of temperature at stations south of 51° of $7^{\circ}8$, between 51° and 52° of $10^{\circ}3$, between 52° and 53° of $10^{\circ}5$, between 53° and 54° of $9^{\circ}8$, and between 54° and 55° of $9^{\circ}8$.

From April to May there was an increase of temperature at stations south of 51° of $4^{\circ}1$, between 51° and 52° of $5^{\circ}1$, between 52° and 53° of $5^{\circ}3$, between 53° and 54° of $3^{\circ}5$, and between 54° and 55° of $3^{\circ}4$.

From May to June there was a increase of temperature at stations south of 51° of $5^{\circ}2$, between 51° and 52° of $5^{\circ}9$, between 52° and 53° of $5^{\circ}6$, between 53° and 54° of $5^{\circ}5$, and between 54° and 55° of $5^{\circ}6$.

About London the mean daily pressure of the atmosphere was above the average till the 12th day, and the mean daily excess of these 12 days was $0^{\circ}42$ in. On April 13th the reading passed below the average, and continued so with but few exceptions to May 12th, the average daily deficiency of pressure for these 30 days was $0^{\circ}15$ in. From May 13th till the 24th the pressure was above the average daily by $0^{\circ}21$ in.; then for two days it was below, and from May 27th to June 3rd there was an excess of $0^{\circ}13$ in. daily, then for six days there was a deficiency averaging $0^{\circ}12$ in. daily. From June 10th to the 14th there was an excess of $0^{\circ}24$ in. daily; on the 15th

the reading was below, and continued so till the 21st, the average deficiency was 0.07 in., the 22nd and 23rd were above by 0.04 in., and from the 24th to the 28th there was a mean deficiency of 0.10 in., and the last two days of the quarter, there was an excess of 0.02 in.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and that the minus sign (−) signifies below the average.

The average duration of the different directions of the wind referred to eight points of the compass, and the duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	APRIL.			MAY.			JUNE.		
	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.
N.W.	d. 2½	d. 2½	d. 0	d. 4½	d. 1½	d. +2½	d. 2	d. 2½	d. -½
N.	1	4½	- 3½	4½	4½	- 0	1½	3½	- 1½
N.E.	3½	6½	- 2½	5½	7½	- 2	5½	3½	+ 1½
E.	5	3½	+ 1½	2	2½	- ½	1½	2½	- 1
S.E.	4	2½	+ 1½	1½	1½	0	1	1½	- ½
S.	4	2½	- 1½	2	2½	- ½	6	2½	+ 3½
S.W.	4	6½	- 2½	7½	8	- ½	7½	10	- 2½
W.	8½	2½	+ 6½	3½	2½	+ 1	4½	4	+ ½

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of April are opposite to W. and S.E.; in May to N.W. and W.; and in June to S. and N.E.

The minus sign (−) denotes deficiencies below averages. In April the largest numbers are opposite to N. and N.E.; in May to N.E. and S.; and in June to S.W. and N.

The mean reading of the barometer for the month of April at the height of 160 feet above the level of the sea was 29.826 ins., being 0.076 in. above the average of 42 years; 0.224 in. above that of 1882; and 0.054 in. above that of 1881.

The mean reading of the barometer for the month of May was 29.784 ins., being 0.007 in. below the average of 42 years, 0.091 in. below that of 1882, and 0.145 in. below that of 1881.

The mean reading of the barometer for the month of June was 29.793 ins., being 0.012 in. lower than the average of 42 years, 0.058 in. above that of 1882, and 0.013 in. below that of 1881.

(From the 42 preceding years' observations the mean pressure of April is 0.001 in. higher than in March; that in May is 0.041 in. higher than in April, and that in June is 0.014 in. higher than in May.)

From March to April there was an increase of pressure at stations south of 51° of 0.060 in.; between 51° and 52° of 0.077 in.; between 52° and 53° of 0.076 in.; between 53° and 54° of 0.054 in. and north of 54° of 0.050 in.

From April to May there was a decrease of pressure at stations south of 51° of 0.027 in.; between 51° and 52° of 0.044 in., between 52° and 53° of 0.047 in. between 53° and 54° of 0.042 in. and north of 54° of 0.052 in.

From May to June there was a decrease at stations south of 50° of 0.003 in., and increase between 51° and 52° of 0.002 in., between 52° and 53° of 0.011 in., and a decrease between 53° and 54° of 0.001 in., and north of 54° of 0.012 in.

Thunderstorms occurred in May on the 6th at Truro, Plymouth, and Torquay; on the 15th at Lowestoft; on the 16th at Plymouth; on the 24th at Whitechurch; on the 25th at Torquay, Lowestoft, Somerleyton, Bolton, and Halifax; and on the 26th at Torquay.

In June, on the 1st at Halifax; on the 8th at Oxford, Wolverhampton, Leicester, Halifax, and Stonyhurst; on the 9th at Strathfield Turgiss, Whitechurch, Oxford, Bedford, and Leicester, on the 10th at Southbourne, Strathfield Turgiss, Oxford, Rugby, and Stonyhurst; on the 15th at Llandudno and Stonyhurst; on the 21st at Osborne and Oxford; on the 25th at Burslem, Royston, Bedford, Cambridge, Lowestoft, Leicester, Llandudno, Bolton, Halifax, Stonyhurst, and Bradford; on the 26th at Whitechurch, Blackheath, Barnet, Royston, Bedford, Cambridge, Rugby, Wolverhampton, Leicester, Bolton, and Bradford; on the 29th at Guernsey, Torquay, Ventnor, Southbourne, Whitechurch, Burslem, Wolverhampton, Leicester, Halifax, Stonyhurst, and Bradford; on the 30th at Blackheath, Barnet, Royston, Rugby, Halifax, and Bradford.

Thunder was heard but lightning was not seen in May, on the 1st at Torquay; on the 3rd at Wolverhampton; on the 6th at Plymouth; on the 11th at Blackheath and Barnet; on the 25th at Oxford, Royston, and Rugby; and on the 26th at Guernsey and Cockermouth.

In June on the 4th at Osborne; on the 5th at Totnes and Torquay; on the 6th at Osborne; on the 8th at Burslem, Liverpool, and Bolton; on the 9th at Ventnor, Burslem, Rugby, and Halifax; on the 10th at Osborne, Whitechurch, and Bedford; on the 13th at Oxford and Cambridge; on the 14th at Oxford; on the 15th at Halifax; on the 16th at Carlisle; on the 18th at Halifax; on the 21st at Blackheath, Barnet, Oxford, and Cambridge; on the 23rd at Carlisle and Silloth; on the 24th at Truro; on the 25th at Rugby; and on the 26th at Oxford and Cambridge; and on the 30th at Cambridge.

Lightning was seen but thunder was not heard in May, on the 5th at Plymouth; and on the 25th at Wolverhampton and Stonyhurst. In June, on the 3rd at Guernsey, Truro, and Torquay; on the 4th, 5th, and 9th at Torquay, on the 10th at Whitechurch, on the 13th at Royston and Cambridge; on the 14th at Lowestoft, on the 24th at Blackheath, on the 25th at Lowestoft and Carlisle; and on the 29th at Torquay, Osborne, Royston, and Cambridge.

Solar halos were seen in April, on the 1st at Torquay, Oxford, and Halifax; on the 4th at Oxford; on the 7th at Torquay, Strathfield Turgiss, and Oxford; on the 10th at Oxford; on the 13th at Hull; on the 14th at Halifax; on the 16th and 19th at Torquay and Oxford; on the 20th and 24th at Oxford; on the 26th at Torquay, Oxford, and Halifax; on the 27th at Halifax.

In May, on the 3rd at Torquay; on the 6th at Torquay and Oxford; on the 7th at Stonyhurst; on the 10th at Torquay and Oxford, on the 14th and 16th at Halifax, on the 17th and 18th at Torquay and Oxford; on the 22nd at Torquay, Halifax, and Stonyhurst; on the 25th at Halifax and Stonyhurst.

In June, on the 2nd at Stonyhurst; on the 5th at Torquay; on the 9th at Stonyhurst; on the 14th at Liverpool and Halifax; on the 16th at Halifax; on the 18th at Stonyhurst; on the 22nd, 25th, and 29th at Torquay.

Lunar halos were seen in April, on the 14th and 16th at Oxford and Halifax; on the 16th at Royston, Cambridge, Lowestoft, and Leicester; on the 17th at Bolton; and on the 18th at Torquay.

In May on the 13th at Ventnor, Marlborough, Oxford, and Leicester; on the 16th at Bolton; on the 17th at Oxford, Rugby, and Halifax; on the 18th at Oxford; and on the 22nd at Halifax.

Aurora borealis was seen in April, on the 2nd at Whitechurch; and on the 3rd at Stonyhurst.

In May on the 11th at Stonyhurst; and on the 26th at Whitechurch.

Snow fell in April, on the 22nd at Bedford and Hull; on the 23rd at Torquay, Ventnor, Osborne, Salisbury, Marlborough, Barnet, Oxford, Burslem, Royston, Cambridge, Rugby, Lowestoft, Somerleyton, Wolverhampton, Llandudno, Bolton, Halifax, and Hull; on the 24th at Torquay, Ventnor, Osborne, Bedford, and Stonyhurst; on the 27th at Whitechurch.

In May, on the 2nd, 3rd, and 4th at Halifax; on the 4th at Rugby, Wolverhampton, and Llandudno; on the 5th at Rugby; on the 8th at Halifax; on the 10th at Salisbury, Marlborough, and Whitechurch; on the 11th at Burslem and Halifax; and on the 12th at Halifax.

Hail fell in April, on the 20th at Truro and Salisbury; on the 22nd at Oxford, Bedford, and Hull; on the 23rd at Torquay, Salisbury, Marlborough, Barnet, Oxford, Royston, Bedford, Cambridge, Rugby, and Hull; on the 24th at Barnet, Oxford, Royston, and Bedford; and on the 25th at Torquay.

In May, on the 3rd at Torquay, Burslem, Royston, and Lowestoft; on the 4th at Oxford, Royston, Rugby, and Wolverhampton; on the 6th at Torquay; on the 9th at Torquay; on the 10th at Oxford, Lowestoft, and Bolton; and on the 11th at Torquay, Marlborough, Barnet, Oxford, Burslem, Rugby, Wolverhampton, Bolton, Halifax, and Stonyhurst.

In June, on the 9th at Leicester; on the 16th at Torquay; on the 25th at Royston and Cambridge; on the 26th at Royston, Bedford, and Wolverhampton; and on the 29th at Whitechurch and Leicester.

The highest temperatures of the air were at Nottingham, 85° 7'; at Cambridge, 85° 7'; and at Camden Square and Bedford, 85° 6.

The lowest temperatures of the air were at Barnet, 22° 4'; at Cambridge, 23° 0'; and at Rugby, 24° 0.

The greatest ranges of temperature were at Salisbury, 29° 7'; at Barnet, 22° 8'; and at Cambridge, 22° 5.

The least daily ranges of temperature were at Guernsey, 11° 6'; at Llandudno, 12° 0'; and at Lowestoft, 12° 2.

The greatest number of days of rain were at Marlborough, Burslem, and Bath 44; at Totnes, 43; and at Torquay, Salisbury, and Bradford, 42.

The least number of days of rain were at Royston, 25; at Bedford, Bath, and Llandudno, 26; and at Barnet, 28.

The greatest falls of rain were at Bath, 8.87 inches; Cambridge, 8.61 inches; and at Stonyhurst, 3.39 inches.

The least falls of rain were at Liverpool, 3.83 inches; at Llandudno, 3.95 inches; and at Brighton, 4.10 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highest. Mean of all Lowest. Mean of the four Means of the Quarter.	Mean Range of Temper- ature in the Quarter.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Air.	Mean Temperature of the Air.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air. Mean additional Weight required for saturation. Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max- imum in Rays of Sun.	Mean Reading of Min- imum on Grass.	WIND.				Mean Amount of Ozone Mean Amount of Cloud.	RAIN.							
															Relative Pro- portion of					Mean Number of Days it fell.	Mean Amount col- lected.

QUARTERLY RETURN

OF

MARRIAGES, BIRTHS, AND

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS

ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE REGISTRATION SUB-DISTRICT.

Number of
District and
Sub-district.

62:2
469:3 & 4
468:7 & 9
494:1

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 139.] **Marriages**—*April, May, June, 1883.*
Births and Deaths—*July, August, September, 1883.* [Price 9d.]

*General Register Office, Somerset House,
1st November, 1883.*

The resident POPULATION of the UNITED KINGDOM in the middle of 1883 is estimated at 35,639,060 persons; that of England and Wales at 26,770,744, of Scotland at 3,825,744, and of Ireland at 5,042,572.

In the United Kingdom the *births* of 271,892 children, and the *deaths* of 148,827 persons, were registered in the three months ending 30th September 1883. The recorded natural increase of population was thus 123,065. The registered number of persons married in the quarter ending 30th June 1883 was 119,428.

The birth-rate in the United Kingdom in the third quarter of 1883 was 30·3 per 1000, and the death-rate 16·6. The marriage-rate in the second quarter of 1883 was 13·4 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars General of those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2156 registration sub-districts of England and Wales during the quarter ending 30th September 1883; and the MARRIAGES in 14,636 churches or chapels, in 9087 registered places of worship unconnected with the Established Church, and in 62 independent Registrars' Offices, in the three months ending 30th June 1883.

27:2

Marriages.

During the three months ending with June last, the marriages of 95,766 persons were registered in England and Wales, corresponding to an annual rate of 14·4 per 1000 of the estimated population in the middle of this year. This marriage-rate was 1·7 below the mean rate in the second quarters of the ten years 1873–82.

In the second quarter of 1880 the marriage-rate was so low as 14·3, but with this exception the rate for the spring quarter of this year, which was 14·4, was lower than in any of the ten preceding corresponding quarters. The rate ranged from 9·5 and 9·9 in Huntingdonshire and Hertfordshire, to 16·1 in Lancashire, 16·9 in Durham, 17·0 in Nottinghamshire, 17·5 in Monmouthshire, 18·0 in Lincolnshire,

18·4 in Northumberland, and 18·8 in Westmorland. Compared with the rates in recent corresponding quarters, the most marked decline occurred in Leicestershire, Gloucestershire, Warwickshire, London, Sussex, and Worcestershire.

Births.

The births registered in England and Wales during the three months ending with September last were 214,144, and 5,974 fewer than in the corresponding quarter of last year. The annual birth-rate was 31·7 per 1000 of the estimated population, and was considerably below the average, and lower than in any of the ten preceding corresponding quarters; indeed, so low a birth-rate has not been recorded in the third quarter of any year since 1849. The county rate did not exceed 25·3 in Herefordshire, 27·0 in Shropshire, 27·2 in both Devonshire and Somersetshire, and 27·8 in Berkshire; it was, however, 34·6 in the North Riding of Yorkshire, 35·3 in Nottinghamshire, 35·5 in Staffordshire, and 38·2 in Durham.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 33·6 per 1000 of their aggregate population, which was 1·9 above the general English rate. In London the rate was 32·8, and in the twenty-seven provincial towns it ranged from 27·8 in Brighton and in Halifax, 28·2 in Bradford, and 29·0 in Huddersfield, to 38·2 in Nottingham, 40·5 in Cardiff, and 42·7 in Sunderland. In fifty other large town districts the birth-rate was 32·9, and was 0·7 below the rate in the larger towns; the lowest rates were 21·8 in Bath, 23·1 in Cheltenham, 23·5 in Southport, 23·6 in Hastings, and 24·1 in Shrewsbury; and the highest 39·6 in South Shields, 39·7 in Wigan, 39·8 in Walsall, and 40·6 in Middlesbrough.

Movement of the Population.

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 105,762 and 102,004 in the third or September quarters of 1881 and 1882, declined to 101,026 in the corresponding period of this year. It appears from returns issued by the Board of Trade that 108,867 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration offices are stationed. Distributing 1,432 whose nationality was undistinguished, and excluding 17,833 foreigners, 90,791 were emigrants of British origin, including 59,034 English, 9,638 Scotch, and 22,119 Irish; the numbers of British emigrants in the three preceding corresponding quarters were 63,311, 72,665, and 75,407 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 2205 from England, 2519 from Scotland, and 4386 from Ireland. Compared with the proportions in the corresponding quarter of 1882, the proportion of emigrants last quarter showed a further increase in each of the divisions of the United Kingdom.

Prices and Pauperism.

The average price of wheat during the three months ending with September last was 42s. 5d., and showed a decline of 3d. from that in the preceding quarter; it was, however, considerably lower than the mean price in the two preceding corresponding quarters. The mean wholesale price of beef and of mutton last quarter was 6½d. and 7½d., per lb. respectively; the mean price of beef showed an increase of ½d. and mutton an increase of ¾d. upon the mean prices which prevailed in the third or corresponding quarter of last year. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 17s. per ton, 3d. above the mean price in the preceding quarter, and 7d. above that which prevailed in the third quarter of last year. The mean price of Consols was 100½l. and showed a decline of 2l. from the high price in the preceding three months. The minimum annual rate of discount charged at the Bank of England, which had been raised to 4 per cent. on 10th May last, was reduced to 3½ per cent. on 13th September, and further reduced to 3 per cent. on 27th September.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 684,523, of whom 165,263 received in-door and 519,260 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with September last was 25·6 per 1000, against 27·0 and 26·3 in the two preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter, at the Royal Observatory, Greenwich, and at other stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found on pages 65 to 72, with accompanying Tables. The mean reading of the barometer for the quarter was below the average and showed the greatest depression in September. The weather was generally fine and warm until 10th July; during the remainder of the month and until 13th August it was cold and unsettled, and between the 14th and 23rd July it was particularly cold. From the 13th August to the end of the month the weather was generally warm. At the beginning of September the weather was again rather cold, after which it was warm until nearly the end of the month. The mean temperature of the air in the quarter was 59°·5, and was 0°·2 below the average for the corresponding period of 112 years. The mean showed a deficiency of 1°·8 in July, and an excess in August and September of 1°·0 and 0°·3 respectively.

Rain fell at Greenwich on 16 days in July, 10 in August, and 17 in September, in all on 43 of the 92 days in the quarter. The rainfall was equal to 6·53 inches, and was 0°·12 of an inch below the average amount in the corresponding periods of 67 years.

At the various stations of observation the recorded rainfall of the quarter ranged from 5·95 inches at Somerleyton to 15·31 inches at Bath.

The number of hours of bright sunshine recorded at Greenwich during the quarter was 421·6, and was nearly identical with the number in the corresponding period of last year; the average amount in the third or summer quarter of the five years 1878-82 was 408·4 hours.

State of the Public Health; Deaths.

During the three months ending with September last 113,118 deaths were registered in England and Wales, corresponding to an annual death-rate of 16·8 per 1000 of the estimated population. This death-rate was 2·1 below the average rate in the ten preceding corresponding quarters. In the third or summer quarters of 1879 and 1881 the English death-rates were so low as 16·3 and 16·8 respectively, but with these exceptions the rate last quarter was lower than in any summer quarter since civil registration commenced. This signifies that the deaths last quarter in England and Wales were fewer by 23,860 than they would have been had the rate of mortality equalled the average rate in the corresponding period of the 45 preceding years.

The decline in the death-rate appears to have been mainly due to the fatality of the principal zymotic diseases being much below the average of recent corresponding quarters.

The county rates ranged from 12·2 in Dorsetshire, 12·3 in Rutlandshire, 12·4 in Berkshire, 13·3 in Gloucestershire, 13·6 in Westmorland, 13·7 in Northamptonshire, 13·8 in both Huntingdonshire and Wiltshire, and 13·9 in both Shropshire and Worcestershire, to 17·2 in the West Riding of Yorkshire, 17·7 in Warwickshire, 17·8 in Nottinghamshire, 19·4 in Lancashire, 19·5 in Durham, and 20·7 in Northumberland.

The 113,118 deaths in England and Wales last quarter included 58,314 of males, and 54,804 of females; the annual death-rate among males was 17·8, and among females 15·8 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 113 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of fifteen and a half millions of persons, the death-rate was 18·3 per 1000; in the remaining and chiefly rural population of about ten and a half millions of persons, the rate was 14·5.

These urban and rural rates were respectively 2·6 and 1·6 below the average rates in the ten preceding corresponding quarters. In equal numbers living the deaths were 126 in the urban to 100 in the rural population, whereas the average proportion in the third quarter of the ten years 1873–82 was 130 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of nearly eight and a half millions of persons, the deaths registered corresponded to an annual rate of 19·9 per 1000 which was 1·6 above the general urban rate; in the corresponding quarter of 1882 the death-rate in these towns was 20·6. In London the death-rate last quarter was 18·8, or 1·9 lower than the average rate in the remaining twenty-seven large English towns. The lowest rates in these towns were 15·0 in Halifax, 15·3 in Bristol, 15·6 in Derby, 16·3 in Birkenhead, 16·4 in Bradford, 17·3 in Cardiff, and 17·6 in Norwich. The highest rates were 24·8 in Liverpool, 24·8 in Preston, 24·9 in Manchester, 27·1 in Newcastle-upon-Tyne, and 27·6* in Sunderland.

In fifty other large town districts, with an aggregate population estimated at rather more than two and a half millions of persons, the deaths registered corresponded to an annual rate of 17·2, being 2·7 below the rate in the twenty-eight larger towns. The rates in these town districts last quarter ranged from 11·0 in Reading, 12·0 in Burton-on-Trent, 12·7 in Barrow-in-Furness, and 13·1 in both Gloucester and Cheltenham, to 20·9 in Stockport, 21·4 in Gateshead, 21·8 in Dudley, 22·1 in Ashton-under-Lyne, and 24·1 in Wigan.

MORTALITY AT DIFFERENT AGES.—The 113,118 deaths last quarter included 30,331 of infants under one year of age, 55,873 of children and adults aged between one and 60 years, and 26,914 persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 142 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality was 162 per 1000, and ranged from 115 in 1879 to 105 in 1880. The lowest county rates of infant mortality last quarter were 62 in Dorsetshire, 79 in Wiltshire, and 80 in Berkshire, while the rates in the other counties ranged upwards to 177 in Nottinghamshire and 196 in Leicestershire. In the twenty-eight large towns the proportion of infant mortality was 185 per 1000, against 190 in the previous corresponding quarter. In London last quarter the rate did not exceed 177, while in the provincial towns it was 191 and ranged from 109 in Halifax, 134 in Bristol, and 142 in Blackburn, to 240 in Brighton, 257 in Preston, and 264 in Leicester. Infant mortality in the fifty other town districts was 153 per 1000 births registered; the lowest rates in these town districts were 72 in Reading, 79 in Chester, 105 in Devonport, and 108 in Oxford; the rates in the other town districts ranged upwards to 209 in York, 214 in Stockport, and 227 in Newport.

The annual rate of mortality in England and Wales last quarter among persons aged between one and 60 years was 9·3 per 1000 against an average rate of 10·3 in the ten preceding corresponding quarters; in only two summer quarters since 1870 (1879 and 1881) was the death-rate, at these ages, so low. In the twenty-eight great towns the deaths registered at these ages corresponded to an annual rate of 11·3 per 1,000 of their aggregate population, and ranged from 6·9 in Leicester, 7·3 in Norwich, and 7·9 in Derby, to 15·6 in Liverpool, 16·9 in Newcastle-upon-Tyne, and 18·9 in Sunderland.

Among persons aged 60 years and upwards the annual death-rate in England and Wales was 53·4 per 1000, and was 1·6 below the average rate in the ten preceding summer quarters. The rates at these ages in the twenty-eight large towns was 57·6, and exceeded the rate in the whole of England and Wales by 4·2; in the several towns the rate ranged from 46·4 in Nottingham, 47·1 in Derby, and 51·0 in Plymouth, to 76·8 in Newcastle-upon-Tyne, 77·2 in Huddersfield, and 79·0 in Manchester.

* The high death-rate in Sunderland was due to the disaster at the Victoria Hall.

Thus the rate of mortality at all ages last quarter was 11·1 per cent. below the average rate in the ten preceding corresponding quarters; among infants under one year of age the decline was equal to 12·3 per cent., among children and adults aged between one and 60 years 9·7 per cent., and among persons aged 60 years and upwards 2·9 per cent.

ZYMOTIC DISEASES.—The 113,118 deaths from all causes included—

8389	ascribed to diarrhœa.
2929	„ scarlet fever.
2066	„ measles.
1706	„ whooping-cough.
1662	„ fever.
888	„ diphtheria.
229	„ small-pox.

Thus the total number of deaths attributed to these diseases was 17,869, corresponding to an annual rate of 2·65 per 1000, against an average rate of 3·78 for the ten preceding third quarters.

The lowest county death-rates from these causes were 0·45 in Dorsetshire, 0·86 in Wiltshire and Rutlandshire, and 0·93 in Westmorland, while the highest were 3·62 in Lancashire, 3·68 in Northumberland and 3·79 in Warwickshire. In the twenty-eight great towns the rate was 4·10, varying from 1·22 in Halifax and 1·74 in Bristol, to 5·94 in Liverpool, 6·69 in Newcastle-upon-Tyne, and 7·29 in Preston. In fifty other considerable towns the rate was 2·68, while in the rest of England and Wales, after excluding these seventy-eight towns, it was 1·84.

The deaths ascribed to *diarrhœa* numbered 8,389, corresponding to an annual death-rate of 1·25 per 1000, against an average rate of 2·01 for the ten preceding third quarters.

The rate in counties varied from 0·00 in Rutlandshire, 0·20 in Dorsetshire, and 0·27 in Herefordshire, to 2·01 in Warwickshire and in Leicestershire, and 2·02 in Lancashire. In the twenty-eight great towns the rate was 2·10, which was not only considerably lower than the average rate, 3·22, in the ten preceding summer quarters, but lower than the rate in any one of those summers excepting that of 1879, when it was 1·2. The rate this quarter varied from 0·48 in Halifax and 0·93 in Bristol, to 3·60 in Bolton, 3·88 in Leicester, and 6·18 in Preston. In fifty other considerable towns the rate was 1·36, rising however to 2·12 in Stoke-on-Trent, 2·23 in Coventry, 2·33 in Gateshead, 2·51 in York, 2·56 in Walsall, and 3·06 in Wigan. In the rest of England and Wales, after excluding these seventy-eight towns, the rate was 0·74.

The deaths ascribed to *scarlet-fever* numbered 2929, corresponding to an annual death-rate of 0·43 per 1000, against an average rate of 0·62 for the ten preceding third quarters. The rate was lower than in any one of these ten quarters.

In counties the rate varied from 0·02 in Berkshire, and 0·04 in Sussex and in Dorsetshire, to 0·85 in Warwickshire and in Monmouthshire, 0·88 in Cornwall, and 0·97 in Staffordshire. In the twenty-eight great towns the rate was 0·59, varying from 0·00 in Norwich, Plymouth, and Birkenhead, to 1·23 in Birmingham, 1·52 in Sheffield, and 1·85 in Leeds. In fifty other considerable towns the rate was 0·50, rising, however, to 2·03 in Walsall, 3·47 in Dudley, 3·69 in Ashton-under-Lyne, and 3·95 in Rotherham. In the rest of England and Wales, excluding these seventy-eight towns, the rate was 0·34, but was excessively high in the sub-districts of Camborne, Marazion, and Midsomer Norton.

The deaths ascribed to *measles* were 2066, corresponding to an annual death-rate of 0·31 per 1000, against an average rate of 0·26 for the ten preceding third quarters. The mortality from this disease was therefore considerably above the average.

In the little counties of Huntingdon, Rutland, and Westmorland, no deaths were registered as due to this disease, while the rate was 1·00 in Monmouthshire, and 1·18 in Northumberland. In the twenty-eight great towns the rate was 0·56, varying from 0·00 in Wolverhampton, Derby, Blackburn, and Preston, to 1·01 in

Brighton and in Salford, 1·21 in Liverpool, and 3·38 in Newcastle-upon-Tyne. In fifty other considerable towns the rate was 0·25, rising, however, to 1·71 in Merthyr Tydfil, and 3·13 in Darlington. In the rest of England and Wales, after excluding these seventy-eight towns, the rate was 0·18, but was excessively high, in no case less than 9·0 per 1000, in the sub-districts of Aberystwith, Llanelli (Crickhowell), and Llangattock.

The deaths ascribed to *whooping-cough* numbered 1706, and corresponded to an annual death-rate of 0·25 per 1000, against an average rate of 0·36 for the ten preceding third quarters.

In counties, the rate varied from 0·05 in Buckinghamshire, and 0·06 in Cambridgeshire, to 0·41 in Northamptonshire, 0·45 in Essex, 0·47 in Suffolk, and 0·53 in Huntingdonshire. In the twenty-eight great towns the rate was 0·33, varying from 0·00 in Wolverhampton and in Preston, to 0·52 in Sheffield, 0·62 in Liverpool, and 0·69 in Brighton. In fifty other considerable towns the rate was 0·23, rising, however, to 0·74 in Worcester, 0·91 in Stockport and in Newport, and 1·17 in Rotherham. In the rest of England and Wales, after excluding these seventy-eight towns, the rate was 0·22.

The deaths ascribed to *fever* numbered 1662, and corresponded to an annual death-rate of 0·25 per 1000, against an average rate of 0·38 for the ten preceding third quarters. The rate was lower than it had been in any one of these ten quarters.

In Dorsetshire and in Cumberland, as also in North Wales, the rate was 0·06, while it was 0·34 in South Wales and in the North Riding of Yorkshire, and 0·41 in Lancashire. In the twenty-eight great towns the rate was 0·32, varying from 0·03 in Leicester, and 0·04 in Norwich, to 0·89 in Portsmouth, and 0·91 in Liverpool. In fifty other considerable towns the rate was 0·23, rising, however, to 0·73 in Ystradfydwg, and to 0·84 in Middlesbrough. In England and Wales, exclusive of these seventy-eight towns, the rate was 0·21.

The deaths ascribed to *diphtheria* were 888, corresponding to an annual death-rate of 0·13 per 1000, against an average rate of 0·10 for the ten preceding third quarters. The rate was higher than in any of these quarters, excepting in 1882, when it was also 0·13.

In counties the rate varied from 0·00 in Westmorland, and 0·02 in Dorsetshire and in the North Riding of Yorkshire, to 0·30 in Middlesex (*extra-met.*) and 0·42 in Cambridgeshire. In the twenty-eight great towns the rate was 0·15, varying from 0·00 in Wolverhampton, Derby, Birkenhead, Blackburn, Huddersfield, Halifax, Bradford, and Newcastle-upon-Tyne to 0·24 in London, 0·27 in Cardiff, and 0·29 in Preston. In fifty other considerable towns the rate was 0·06; while in the remainder of England and Wales, after excluding these seventy-eight towns, the rate was 0·13, rising, however, to a much higher point in many sub-districts, among which were Hambleton, Kingsclere, Willingham, and Epworth.

The deaths from *small-pox* numbered 229, and corresponded to an annual death-rate of 0·03 per 1000, against an average rate of 0·05 for the ten preceding third quarters.

Of the 229 deaths, 56 occurred in Warwickshire, all but two being registered in Birmingham, 49 in Staffordshire, 35 in Durham, 23 in London, 16 in Northumberland, and 11 in Lancashire, leaving 39 as the share of the rest of the country.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in the fifty other considerable urban districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Third Quarter
of 1883.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.

England and Wales, } less the 78 Towns - }	1.84	0.02	0.18	0.34	0.13	0.22	0.21	0.74

CERTIFICATION OF CAUSES OF DEATH.—The causes of 102,397, or 90.6 per cent. of the 113,118 deaths in England and Wales last quarter, were certified by registered medical practitioners in attendance during the last illness, and 6593, or 5.8 per cent. by coroners in inquest cases. The causes of the remaining 4128, or 3.6 per cent. of the deaths were uncertified. The proportion of uncertified deaths showed a further decline from that which prevailed in the three preceding quarters; in London it did not exceed 1.0 per cent., whereas it was 4.2 per cent. in the rest of England and Wales. The per-centage of uncertified causes of death was but 0.8 in Wiltshire, 1.6 in Hampshire, 1.7 in the extra-metropolitan portion of Middlesex, and 1.8 in Berkshire; it ranged upwards to 5.4 in Derbyshire, 5.5 in Cumberland, 5.6 in the West Riding of Yorkshire, 6.6 in Cornwall, and 6.9 in Durham.

In Wales 9.5 per cent. of the causes of death were uncertified, showing a considerable decline from the per-centages in recent quarters; the proportion was 9.4 in South Wales and 9.7 in North Wales.

In the twenty-eight great towns the proportion of uncertified deaths was 2.4 per cent.; but while it did not exceed 1.0 in London, it was 3.4 in the twenty-seven provincial towns. The per-centage of uncertified deaths in these provincial towns ranged from 0.7 in Birmingham, 0.8 in Portsmouth, 0.9 in both Plymouth and Derby, to 4.9 in Liverpool, 6.7 in Wolverhampton, 8.1 in Oldham, and 9.6 in Halifax. With the exception of Oldham, Wolverhampton, and Portsmouth, these proportions showed a general decline from those prevailing in recent months.

VIOLENT DEATHS.—The deaths referred last quarter to different forms of violence were 4,429, and corresponded to an annual rate of 0.66 per 1000 of the estimated population, and to 3.9 per cent. of the total deaths. The death-rate from violence in the different counties ranged from 0.34 in Sussex, 0.38 in Wiltshire, and 0.46 in Gloucestershire, to 0.80 in Cumberland, 0.94 in Monmouthshire, and 1.40 in Durham. In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0.79 per 1000; the rates in the several towns ranged from 0.27 in Bradford, 0.36 in Brighton, 0.37 both in Leicester and Preston, to 0.89 in Cardiff, 1.15 in Liverpool, and 6.53 in Sunderland.

INQUESTS.—During the three months ending with September last, 6593 inquest cases were registered, corresponding to an annual rate of 5.8 per cent. of the total deaths. The proportion of inquests was rather above the average proportion in the ten preceding corresponding quarters. In the twenty-eight large towns the proportion of inquests to deaths was 6.5 per cent.; it ranged from 1.8 in Preston, and 2.8 in both Brighton and Oldham, to 10.0 in Bristol, and 25.1 in Sunderland.

DEATHS IN PUBLIC INSTITUTIONS.—In workhouses, hospitals, and public lunatic asylums 11,815 deaths, or 10·4 per cent. of the total deaths, were registered during last quarter; this proportion was 1·7 in excess of the mean per-centage in the third quarter of the ten years 1873–82. In the corresponding periods of 1881 and 1882 the proportion of deaths in public institutions were 10·2 and 9·5 per cent. respectively. In the twenty-eight great towns 6591, or 15·4 per cent., of the deaths were recorded in the principal public institutions, against 14·2 per cent. in the third quarter of 1882; the proportion of institution deaths in these towns last quarter ranged from 7·1 in Preston, 7·8 in Leeds, and 7·9 in Sheffield, to 16·1 in Liverpool, 16·7 in Wolverhampton, 17·7 in Manchester, and 20·1 in London. Excluding the twenty-eight great towns the proportion of such deaths in the rest of England and Wales did not exceed 7·4 per cent.

HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending with September in twenty-nine Colonial and Foreign cities, having an aggregate population of rather more than fourteen millions of persons, was 27·5 per 1000. In the twenty-two European cities the average rate was 26·9 per 1000, against 19·9 in twenty-eight of the largest English towns. Among the twenty-eight Colonial and Foreign cities the lowest death-rates were 18·0 in Christiania, 19·2 in Rotterdam, 19·7 in Geneva, and 21·0 in Copenhagen; in the other towns the rates ranged upwards to 34·9 in Munich, 35·4 in Breslau, 37·1 in Berlin, and 41·1 in Madras. The deaths referred to small-pox in Paris, which in three preceding quarters had been 101, 154, and 181, declined last quarter to 78; the fatal cases of measles and of diphtheria also showed a marked decline from those returned in the two previous quarters of the year. The deaths from typhoid fever in Paris, which in the two preceding quarters had been 582 and 523, were 524 during the three months ending with September last, and equal to an annual rate of 0·94 per 1000, while the rate from the same disease in London did not exceed 0·22 per 1000. The fatal cases of small-pox in St. Petersburg, which had been 232 and 129 in the two previous quarters, further declined to 41; the deaths referred to each of the other principal zymotic diseases, except whooping-cough and diarrhoeal diseases, also showed a marked decline. Small-pox was epidemic during the quarter in Madras, Brussels, and Prague. Measles caused 392 deaths in Berlin, 227 in Paris, and 137 in Munich. Diphtheria showed increased prevalence in Amsterdam, Berlin, Dresden, and Prague. The deaths referred to typhus and typhoid fever in St. Petersburg, which had been 321 and 356 in the two preceding quarters of the year, declined to 224 last quarter, but were equal to a rate of 0·97 per 1000, against a rate of only 0·23 from the same disease in London. Typhoid fever showed increased prevalence in Berlin, Vienna, New York, and Philadelphia. Diarrhoeal diseases showed excessive fatality in many of the continental cities; the annual death-rates from these diseases, which averaged only 2·1 per 1000 in the twenty-eight large English towns, was equal to 8·2 in Breslau, 8·4 in Munich, 8·7 Brooklyn, and 11·3 in Berlin.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1873-83**, and in each Quarter of those Years.

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns which have been supplied by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

555	Gateshead - - - M† -	69,705	647	376	36·8	21·4	4·2	195	Gateshead Sub-district.
557	Tynemouth - - - M† -	47,789	439	238	36·4	19·8	3·5	157	Nrth. Shields & Tynemouth Sub-ds.
572	Carlisle - - - M† -	40,906	302	177	29·3	17·2	2·3	136	St. Outhbert & St. Mary Sub-dists.
	XI.—MONMOUTHSH. & WALES.								
585	Newport (Monmouth) M† -	34,918	344	156	39·1	17·7	3·1	227	Newport Sub-district.
587	Ystradyfodwg - L. G. D.†	54,630	510	191	37·0	13·9	2·0	151	Ystradyfodwg Sub-dist. of Pontypridd.
588	Merthyr Tydfil - - P -	89,840	744	395	32·9	17·4	1·6	137	Lower and Upper Merthyr Tydfil and Aberdare Sub-districts.
592	Swansea - - - M -	87,983	780	428	35·2	19·3	3·6	192	Llangafelach, Swansea, and Llan-samlet Sub-districts.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

TABLE VIII.—Annual Death-rate per 1,000 living from **Diarrhoea** in ENGLAND, and in 78 LARGE TOWNS during the Third or Summer Quarter of each of the Years 1881, 1882, and 1883.

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality for the above Table, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, have been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE XIII.—**Births and Deaths in the Third Quarter of 1883, in 29 Foreign Cities having an estimated aggregate Population of 14,112,671 persons.**

CITIES.	POPULATION (enumerated or estimated).	BIRTHS. (Excluding Stillborn.)	DEATHS.	ANNUAL RATE per 1000 Persons living.		DEATHS FROM EPIDEMIC DISEASES.

* The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).
 b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.
 c See page 14, note.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND, of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHEA, CHOLERA, and VIOLENCE, also INQUEST CASES and in the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and of ENGLAND.

* The Superintendent Registrars' Districts are collections of contiguous Parishes or Places, nearly always identical with the Poor Law Unions of the same names; they are now 630 in number, and are here arranged topographically under the Registration Counties.

† These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

* See page 14, note b.

^a The Registration Sub-districts (2136 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

^b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 29th September.

b 623 : 2.—Of the 6 deaths from scarlet fever, 4 occurred in Bangor Urban Sanitary District.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING SEPTEMBER 30TH, 1883.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in July was generally fine and warm till the 10th day, followed by cold unsettled weather during the remainder of the month; between the 14th and 23rd day the weather was particularly cold. The sky was generally obscured by clouds. Upon the whole the month was cold with rain a little above the average amount. The hay harvest was very much checked, but many crops were benefited by the rain.

The weather in August was cold at the beginning and warm generally from the 13th day, with a rain-fall less than the average and a high barometer reading. It was a fine month for harvest work, and the bright sunshine after the middle of the month was favourable for ripening the green crops. The month was nearly free from thunderstorms.

The weather in September was rather cold at the beginning of the month, followed by a warm period which extended nearly to the end. The fall of rain was above the average at most stations. The harvest at all southern stations was gathered in good condition, but, at northern stations, the severe gales of wind on the 23rd and 25th days, interfered with harvest operation and in some places the crop was injured. There were very few thunderstorms in the month.

About London the mean daily temperature of the air was above its average until the 4th day, the mean excess being $4^{\circ}.7$, then the 5th was below by $1^{\circ}.2$, for 4 days the temperature was above its average by $1^{\circ}.4$ daily, then followed a cold period of 39 days and the mean deficiency was $3^{\circ}.8$; this was followed by a warm period of 13 days, the daily excess being $2^{\circ}.8$; from August 31st to September 11th, the deficiency was $2^{\circ}.8$ daily, and from September 12th to the end of the quarter the mean daily excess was $1^{\circ}.7$.

The mean temperature of the air for July was $59^{\circ}.9$, being $1^{\circ}.8$ and $2^{\circ}.3$ below the averages of 112 years, and 42 years respectively; it was $0^{\circ}.5$, $5^{\circ}.5$, $1^{\circ}.8$ lower than in 1882, 1881, and 1880 respectively.

The mean temperature for August was $61^{\circ}.9$, being $1^{\circ}.0$ and $0^{\circ}.6$ above the averages of 112 years and 42 years respectively; it was $2^{\circ}.3$ and $2^{\circ}.8$ higher than in 1882 and 1881 respectively, and $0^{\circ}.9$ lower than in 1880.

The mean temperature for September was $56^{\circ}.8$, being $0^{\circ}.3$ above the averages of 112 years, and $0^{\circ}.3$ below the average of 42 years; it was $2^{\circ}.5$, and $1^{\circ}.4$ higher than in 1882 and 1881 respectively, and $2^{\circ}.9$ lower than in 1880.

The mean temperature for the quarter was $59^{\circ}.5$ being $0^{\circ}.2$ and $0^{\circ}.7$ below the averages of 112 years and 42 years respectively.

The mean high day temperature of the air in July was $70^{\circ}.6$, being $3^{\circ}.6$ lower than the average of 42 years; in August it was $74^{\circ}.0$, being $1^{\circ}.2$ higher than the average, and in September was $66^{\circ}.4$, being $1^{\circ}.0$ below the average.

The mean low night temperature of the air in July was $51^{\circ}.3$, being $1^{\circ}.9$ below the average of 42 years; in August it was $52^{\circ}.8$, being $0^{\circ}.4$ below the average; and in September it was $49^{\circ}.7$, being $0^{\circ}.6$ above the average.

Therefore both the high day temperatures and low night temperatures were cold in July, the high day temperatures were warm and the nights cold in August, and the days cold and the nights warm in September.

The mean daily range of temperature in July was $1^{\circ}.7$ less than the average, in August it was $1^{\circ}.6$ greater than the average, and in September it was $1^{\circ}.6$ smaller than the average.

The mean temperature of the air in July was $0^{\circ}.9$ higher than in June; in August it was $2^{\circ}.0$ higher than July, and in September it was $5^{\circ}.1$ lower than in August.

(From the preceding 42 years' observations the increase of temperature from June to July is $3^{\circ}.3$; the decrease of temperature from July to August is $0^{\circ}.9$, and the decrease from August to September is $4^{\circ}.2$.)

From June to July there was an increase of temperature at stations south of 51° of $2^{\circ}.0$, between 51° and 52° of $0^{\circ}.8$, between 52° and 53° of $1^{\circ}.5$, between 53° and 54° of $1^{\circ}.8$, and between 54° and 55° of $2^{\circ}.3$.

From July to August there was an increase of temperature at stations south of 51° of $2^{\circ}.0$, between 51° and 52° of $1^{\circ}.9$, between 52° and 53° of $1^{\circ}.8$, between 53° and 54° of $1^{\circ}.7$, and between 54° and 55° of $0^{\circ}.4$.

From August to September there was a decrease of temperature south of 51° of $3^{\circ}.1$, between 51° and 52° of $4^{\circ}.9$, between 52° and 53° of $3^{\circ}.6$, between 53° and 54° of $3^{\circ}.2$, and between 54° and 55° of $2^{\circ}.6$.

About London the mean daily pressure of the atmosphere was above its average for the first two days, from the 3rd to the 15th it was below the daily deficiency being $0^{\circ}.17$ in.; the 16th and 17th days were above, then from the 18th till the 24th, it was below its average, and the daily deficiency was $0^{\circ}.18$ in., this was followed by four days above the daily excess being $0^{\circ}.16$ in. From July 29th to the 31st the daily deficiency was $0^{\circ}.17$ in. From August 1st to 5th there was a mean daily excess of $0^{\circ}.23$ in., from the 6th the readings were below until the 15th, the average deficiency was $0^{\circ}.09$ in., for 12 days the mean daily excess was $0^{\circ}.17$ in., on August 28th the

reading passed below the average, and continued so with few exceptions till September 11th; then for 8 days there was an excess of pressure; and from the 20th to the end of the quarter there was a deficiency of 0.27 in. daily.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and that the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JULY.			AUGUST.			SEPTEMBER.		
	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.
N.W.	d. 5½	d. 2½	+ 2½	d. 4	d. 2½	+1½	d. 5	d. 2	+3
N.	1½	3½	- 2½	0	3½	-3½	1	4½	-3½
N.E.	½	3½	- 3	0	3½	-3½	1	5½	-4½
E.	0	1½	- 1½	2½	1½	+ ½	5	2½	+2½
S.E.	1	1	0	1½	1½	+ ½	2	2	0
S.	3½	3	+ ½	3½	3½	-1½	2	3	-1
S.W.	8½	11	- 2½	8½	10½	-2½	5	8	-3
W.	10½	4½	+ 6	13	4½	+8½	9	3	+6

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of July are opposite to W. and N.W.; in August to W. and N.W.; and in September to W. and N.W.

The minus sign (−) denotes deficiencies below averages. In July the largest numbers are opposite to N.E. and N.; in August to N. and N.E.; and in September to N.E. and N.

The mean reading of the barometer for the month of July at the height of 160 feet above the level of the sea was 29.688 ins., being 0.109 in. below the average of 42 years; 0.012 in. lower than that in 1882; and 0.137 in. lower than that in 1881.

The mean reading of the barometer for the month of August was 29.841 ins., being 0.060 in. above the average of 42 years, 0.101 in. above that in 1882, and 0.165 in. above that in 1881.

The mean reading of the barometer for the month of September was 29.648 ins., being 0.154 in. below the average of 42 years, 0.039 in. below that in 1882, and 0.153 in. below that in 1881.

(From the preceding 42 years' observations the mean pressure of July is 0.008 in. lower than in June; that in August is 0.016 in. lower than in July, and that in September is 0.021 in. higher than in August.)

From June to July there was a decrease of pressure at stations south of 51° of 0.081 in.; between 51° and 52° of 0.105 in.; between 52° and 53° of 0.134 in.; between 53° and 54° of 0.149 in. and north of 54° of 0.170 in.

From July to August there was an increase of pressure at stations south of 51° of 0.160 in.; between 51° and 52° of 0.159 in., between 52° and 53° of 0.163 in., between 53° and 54° of 0.165 in., and north of 54° of 0.119 in.

From August to September there was a decrease at stations south of 51° of 0.212 in., between 51° and 52° of 0.198 in., between 52° and 53° of 0.183 in., between 53° and 54° of 0.162 in., and north of 54° of 0.140 in.

Thunderstorms occurred in July on the 2nd at Guernsey, Osborne, Strathfield Turgiss, and Halifax; on the 3rd at Osborne, Marlborough, Cardington, Leicester and Halifax; on the 4th at Lowestoft, Wolverhampton, and Carlisle; on the 5th at Carlisle; on the 13th and 14th at Cardington; on the 14th at Truro, Osborne, Lowestoft, and Somerleyton; on the 15th at Osborne, Bath, and Cambridge; on the 21st at Cardington and Cambridge; on the 23rd at Bath; on the 31st at Strathfield Turgiss, Cardington, Lowestoft, and Somerleyton.

In August on the 8th at Barnet; and on the 9th at Silloth.

In September on the 20th at Torquay; and on the 21st at Ventnor.

Thunder was heard but lightning was not seen in July, on the 2nd at Wolverhampton; on the 3rd at Whitechurch, Cambridge, and Wolverhampton; on the 4th at Whitechurch; on the 11th at Cambridge; on the 13th at Truro, Bath, Marlborough, and Somerleyton; on the 14th at Strathfield Turgiss, Bath, Marlborough, Cambridge, and Wolverhampton; on the 15th at Marlborough and Wolverhampton; on the 21st at Osborne, Marlborough, and Somerleyton; on the 23rd and 24th at Carlisle; on the 25th at Cambridge; on the 26th at Whitechurch; and on the 31st at Marlborough.

In August, on the 3rd at Royston; on the 8th at Whitechurch and Halifax; on the 12th and 14th at Stonyhurst; and on the 22nd at Lowestoft.

In September on the 2nd at Whitechurch; on the 3rd at Silloth; on the 15th at Burslem, Bolton, and Stonyhurst; on the 18th at Stonyhurst and Silloth; on the 22nd at Torquay and Hull; on the 28th at Silloth.

Lightning was seen but thunder was not heard in July on the 2nd at Bath and Cambridge; on the 3rd at Bath, Whitechurch, Cambridge, and Lowestoft; on the 14th and 25th at Cambridge.

In August, on the 6th at Torquay, Osborne, and Oxford; and on the 26th at Stonyhurst and Carlisle.

In September, on the 18th at Stonyhurst; and on the 20th at Whitechurch, Cardington, Rugby, and Wolverhampton.

Solar halos were seen in July on the 1st at Halifax; on the 8th at Lowestoft; on the 19th at Strathfield Turgiss; on the 20th at Halifax; and on the 21st at Lowestoft.

In August, on the 5th at Stonyhurst; on the 12th at Halifax; on the 16th at Torquay and Stonyhurst; on the 19th at Torquay, Oxford, Burslem, and Halifax; on the 20th at Stonyhurst; on the 25th at Halifax; on the 26th and 27th at Torquay and Halifax.

In September, on the 4th at Stonyhurst; and on the 5th, 7th, 17th, 23rd, and 25th at Torquay.

Lunar halos were seen in July, on the 18th at Bolton; and on the 19th at Lowestoft and Halifax.

In August, on the 11th at Ventnor; on the 16th at Ventnor and Halifax; on the 18th at Totnes, Torquay, and Halifax; on the 19th at Torquay and Oxford; and on the 21st at Halifax.

In September, on the 16th at Stonyhurst; and on the 19th at Cambridge.

Aurora borealis was seen in August, on the 6th at Whitechurch.

In September, on the 5th at Silloth.

Snow fell in July, on the 15th at Whitechurch.

Hail fell in July on the 3rd at Whitechurch; on the 4th at Wolverhampton; on the 14th at Truro and Somerleyton; on the 15th at Marlborough, Cambridge, and Stonyhurst; on the 21st at Truro and Whitechurch; on the 23rd at Bath.

In August, on the 3rd at Halifax; and on the 10th at Osborne.

In September, on the 16th and 17th at Stonyhurst; and on the 29th at Blackheath.

Fog prevailed in July, on the 19th at Stonyhurst; on the 24th and 27th at Bath; and on the 31st at Stonyhurst.

In August, on the 3rd at Stonyhurst; on the 4th at Strathfield Turgiss, Whitechurch, Barnet, Cardington, and Stonyhurst; on the 5th at Stonyhurst; on the 16th and 17th at Guernsey; on 19th at Barnet and Royston; on the 20th at Totnes and Torquay; on the 22nd and 24th at Bath; on the 25th at Bath, Barnet, Oxford, and Royston; on the 26th at Truro and Bath; on 27th at Guernsey; and on the 31st at Torquay.

In September, on the 1st at Cambridge; on the 4th at Torquay; on the 8th and 9th at Bolton; on the 10th at Guernsey; on the 13th at Blackheath, Cambridge, and Bolton; on the 14th at Cambridge; on the 15th at Bolton; on the 16th at Guernsey, Ventnor, Whitechurch, Blackheath, Cardington, Cambridge, and Bolton; on the 17th at Plymouth, Torquay, Ventnor, Whitechurch, Blackheath, Cambridge, Wolverhampton, Llandudno, and Hull; on the 18th at Whitechurch, Blackheath, Cambridge, Wolverhampton, Bolton, and Hull; on the 19th at Torquay, Blackheath, Cambridge, and Wolverhampton; on the 21st at Cambridge and Wolverhampton; on the 23rd at Whitechurch, Cardington, and Wolverhampton.

QUARTERLY RETURN
OF
MARRIAGES, BIRTHS, AND DEATHS
REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF
ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 140.] **Marriages**—*July, August, September, 1883.*
Births and Deaths—*October, November, December, 1883.* [Price 9d.]

General Register Office, Somerset House,
31st January, 1884.

The resident POPULATION of the UNITED KINGDOM in the middle of 1883 is estimated at 35,639,060 persons; that of England and Wales at 26,770,744, of Scotland at 3,825,744, and of Ireland at 5,042,572.

In the United Kingdom the *births* of 272,040 children, and the *deaths* of 167,203 persons, were registered in the three months ending 31st December 1883. The recorded natural increase of population was thus 104,815. The registered number of persons married in the quarter ending 30th September 1883 was 125,704.

The birth-rate in the United Kingdom in the fourth quarter of 1883 was 30.3 per 1000, and the death-rate 18.6. The marriage-rate in the third quarter of 1883 was 14.0 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars General of those parts of the United Kingdom.

ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2154 registration sub-districts of England and Wales during the quarter ending 31st December 1883; and the MARRIAGES in 14,655 churches or chapels, in 9126 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 30th September 1883.

Marriages.

During the three months ending September last, the marriages of 104,384 persons were registered in England and Wales, corresponding to an annual rate of 15.5 per 1000 of the estimated population in the middle of 1883. This marriage-rate was exactly the same as the mean rate in the corresponding quarters of the ten years 1873-82, but showed an increase of 0.1 upon the rate recorded in the third quarter of 1882.

The marriage-rate in the third quarter was most depressed in 1879 (14.1 per 1000), since which period it has steadily recovered. The annual marriage-rate in the third quarter of 1883 ranged from 9.4 in Huntingdonshire, 10.0 in Hereford-

shire, 10·5 in North Wales, 10·5 in Rutlandshire, and 10·9 in Suffolk to 17·4 in Lancashire, 17·5 in Nottinghamshire, 17·8 in Monmouthshire, and 19·7 in London. Compared with the rates in recent corresponding quarters, the increase in the quarter under notice was most marked in Buckinghamshire, Oxfordshire, Bedfordshire, Wiltshire, Cornwall, Westmorland, and Monmouthshire.

Births.

The births registered in England and Wales during the three months ending December last were 214,882, showing a decrease of 2715 from the number returned in the corresponding period of 1882. The annual birth-rate, which was 31·8 per 1000 of the estimated population, was 2·4 below the mean rate in the ten preceding corresponding quarters, and also showed a decline from the rates recorded in recent corresponding quarters. So low a birth-rate has not been recorded in the fourth quarter of any year since 1855. The lowest county birth-rates last quarter were 26·2 in Hertfordshire, 26·4 in Shropshire, 26·9 in Dorsetshire, 27·6 in Devonshire, 28·0 in Cambridgeshire, 28·0 in Wiltshire, 28·1 in Rutlandshire, and 28·2 in Sussex; the highest rates were 35·6 in Essex, 36·3 in Staffordshire, 37·2 in Durham, and 37·3 in Nottinghamshire.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 33·2 per 1000 of their aggregate population, and was 1·4 above the general English rate. The birth-rate, which did not exceed 32·4 in London, corresponded to an annual rate of 33·8 in the twenty-seven provincial towns. In these provincial towns the rates ranged from 26·1 in Halifax, and 26·9 both in Bradford and in Brighton, to 37·4 in Blackburn, 37·6 in Nottingham, 38·1 in Cardiff, and 40·5 in Sunderland. In fifty other large town districts the birth-rate was 33·4, and 0·2 above the rate in the great towns; but while the rates did not exceed 21·7 in Southport, 24·2 in Cheltenham, 24·6 in Hastings, and 25·0 in Bath; they ranged upwards to 40·1 in South Shields, 40·6 in Middlesbrough, 41·6 in St. Helen's, and 41·8 in Newport.

Movement of the Population.

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 94,314 and 84,406 in the fourth or December quarters of 1881 and 1882, was 85,977 last quarter. From returns issued by the Board of Trade, it appears that 61,778 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 1123 whose nationality was undistinguished, and excluding 8973 foreigners, 52,805 were emigrants of British origin, including 37,832 English, 5138 Scotch, and 9835 Irish; the numbers of British emigrants in the three preceding corresponding quarters were 37,440, 48,587, and 47,123 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1413 from England, 1343 from Scotland, and 1950 from Ireland.

Compared with the proportion in the corresponding quarter of 1882, the proportion of emigrants last quarter showed an increase in England and Ireland, whereas it had declined in Scotland.

Prices and Pauperism.

The average price of wheat during the three months ending with December last was 40s. and showed a decline of 2s. 5d. from that in the preceding quarter; it was lower than the mean price in the last quarter of any year since 1864. The mean wholesale price of beef and of mutton last quarter was 6 $\frac{3}{4}$ d. and 7 $\frac{3}{4}$ d., per lb. respectively; the mean price of both beef and mutton was $\frac{3}{8}$ d. below the mean prices prevailing in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 17s. 9d. per ton, being 9d. above the mean price in the preceding quarter, and

7d. above that which prevailed in the fourth quarter of last year. The mean price of Consols was $101\frac{1}{8}l.$ and was $1\frac{3}{8}l.$ above the mean price in the preceding three months. The minimum annual rate of discount charged at the Bank of England, was 3 per cent., no change having been made during the quarter.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 696,785, of whom 178,715 received in-door and 518,070 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with December last was 26.0 per 1000, against 27.5 and 27.1 in the two preceding corresponding quarters.

Meteorology.

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich, and at various stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found on pages 65-72, with accompanying Tables. The mean reading of the barometer for the quarter was 29.814 inches, and 0.068 of an inch above the average for the corresponding period of 42 years; the mean showed an excess in October and December, but was below the average in November. The weather during the first week of October, and from the 18th to the 21st, was cold, while the remainder of the month was warm; November was for the most part cold until the 15th, and warm afterwards; in December the weather was variable till the 18th, but after this date it was unusually mild. The mean temperature of the air in the quarter was $44^{\circ}.9$, and was $1^{\circ}.3$ above the average for the corresponding period of 112 years. The mean was above the average in each month.

At 41 stations of observation the mean temperature of the quarter ranged from $40^{\circ}.3$ at Royston, and $41^{\circ}.9$ at Halifax, to $48^{\circ}.2$ in Guernsey, and $49^{\circ}.0$ at Osborne.

Rain fell at Greenwich on 14 days in October, 21 in November, and 15 in December, or on 50 of the 92 days in the quarter. The amount of rain measured at Greenwich during the quarter was 5.26 inches, and was 1.93 inches below the average amount in the corresponding periods of 67 years.

At the various stations of observation the recorded rainfall of the quarter ranged from 4.94 inches at Strathfield Turgiss, to 15.92 at Stonyhurst, and 17.77 inches at Bolton.

The number of hours of bright sunshine recorded at Greenwich during the quarter was 143.2, and exceeded by 8.9 the number in the corresponding period of last year; the average amount in the fourth quarter of the five years 1878-82 was 148.8 hours.

State of the Public Health; Deaths.

During the three months ending with December last 128,905 deaths were registered in England and Wales, corresponding to an annual death-rate of 19.1 per 1000 of the estimated population. This death-rate was 1.8 below the mean rate in the ten preceding corresponding quarters, but exceeded by 0.4 the exceptionally low rate in the fourth quarter of 1881. The low rate last quarter implied that nearly 17,000 persons survived the three months who would have died had the death-rate corresponded with the average rate in the 45 preceding corresponding quarters.

The death-rates in the English counties last quarter ranged from 13.1 in Rutlandshire, 14.7 in Dorsetshire, 15.2 in the extra-metropolitan portion of Surrey, 15.3 in Huntingdonshire, and 15.4 in both Sussex and Shropshire, to 20.5 in Durham, 21.1 in Northumberland, 21.8 in Staffordshire, 21.9 in Monmouthshire, and 22.7 in Lancashire.

The 128,905 deaths last quarter included 66,292 of males, and 62,613 of females. The annual death-rate among males was 20.2, and among females 18.1 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 112 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of fifteen and a half millions of persons, the death-rate was 20·7 per 1000; in the remaining and chiefly rural population of about ten and a half millions of persons, the rate was 16·6.

These urban and rural rates were respectively 2·2 and 1·4 below the average rates in the ten preceding corresponding quarters. In equal numbers living the deaths were 125 in the urban to 100 in the rural population, whereas the average proportion in the fourth quarters of the ten years 1873–82 was 127 to 100.

In the twenty-eight great English towns, including London, and having an estimated population (in the middle of 1883) of more than eight and a half millions of persons, the registered deaths corresponded to an annual rate of 21·2 per 1000, being 0·5 above the general urban rate. The death-rate did not exceed 20·3 in London, whereas it was 21·9 in the twenty-seven provincial towns, among which it ranged from 16·8 in Portsmouth, and 17·7 in Bradford, to 25·7 in Preston, 26·7 in Newcastle, and 27·9 in Manchester.

In fifty other large town districts, with an aggregate population estimated at rather more than two and a half millions of persons, the registered deaths corresponded to an annual rate of 21·0, being 0·2 below the rate in the twenty-eight great towns.

The lowest rates among these fifty towns were 12·8 in Colchester, 14·2 in Dover, 14·7 in Maidstone, and 15·2 in both Darlington and Gloucester; the highest rates were 27·2 in Stoke-upon-Trent, 28·5 in Ashton-under-Lyne, 28·7 in Wigan, and 33·4 in Dudley.

MORTALITY AT DIFFERENT AGES.—The 128,905 deaths last quarter included 30,560 of infants under one year of age, 64,932 of children and adults aged between one and 60 years, and 33,413 of persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 142 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality averaged 144 per 1000, and ranged from 154 in 1874, to 129 in 1881. The lowest county rates of infant mortality last quarter were 74 in Rutlandshire, 87 in Wiltshire, and 90 in Huntingdonshire, while the highest were 165 in Monmouthshire, 176 in Lancashire, and 177 in Staffordshire. In South Wales the rate was 165.

In the twenty-eight great towns the proportion of infant mortality was 159 per 1000 births, and exceeded the general English rate by 17. The rate did not exceed 144 in London, but was 170 in the twenty-seven provincial towns, among which it ranged from 114 in Portsmouth, 123 in Sunderland, 142 in Wolverhampton, and 143 in Sheffield, to 191 in Leeds, 195 in Manchester, 200 in Blackburn, and 220 in Preston. In fifty other large town districts, the rate of infant mortality was 164 per 1000 births; while the proportion was but 80 in Colchester, 96 in Hastings, and 97 in Darlington, it ranged upwards to 239 in Stoke-upon-Trent, 243 in Macclesfield, and 245 in Bury.

Among persons aged between one and 60 years the annual rate of mortality was 10·8 per 1000 persons estimated to be living at these ages, against an average of 11·8 in the ten preceding corresponding quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·8 per 1000, ranging from 8·0 in Norwich, 8·5 in Portsmouth, 9·6 in Leicester, and 9·7 in Bristol, to 15·9 in both Liverpool and Leeds, 16·1 in Salford, 17·2 in Newcastle, and 17·9 in Manchester.

The deaths among persons aged 60 years and upwards corresponded to an annual rate of 66·3, and was 5·6 below the mean rate at these ages in the ten preceding fourth quarters of 1873–82. The deaths at these ages in the twenty-eight towns corresponded to an annual rate of 73·3 per 1000, and exceeded the general English rate by 7·0. In London this rate was 70·4, while it was 76·1 in the twenty-seven provincial towns, ranging from 55·2 in Leicester, 58·1 in Plymouth, and 60·5 in Norwich, to 89·6 in Newcastle, 93·2 in Manchester, and 102·4 in Halifax.

The rate of mortality at all ages was 8·6 per cent. below the mean rate in the ten preceding corresponding quarters. The death-rate of infants showed a

decrease of 1·4 per cent., that among children and adults aged between one and 60 years a decrease of 8·5 per cent., and that among persons aged 60 years and upwards a decrease of 7·8 per cent., below the same average.

ZYMOTIC DISEASES.—The 128,905 deaths from all causes included—

4197	attributed to scarlet fever.
3148	„ diarrhœa.
2493	„ measles.
2197	„ fever.
1794	„ whooping-cough.
1227	„ diphtheria.
231	„ small-pox.

Thus the total number of deaths ascribed to these causes was 15,287, corresponding to an annual rate of 2·27 per 1000, against an average rate of 2·87 for the ten preceding fourth quarters.

The lowest county rates from these causes were 0·17 in Rutlandshire, 0·68 in Westmorland, 0·84 in Huntingdonshire, 0·85 in Shropshire, and 0·94 in Wiltshire; while the highest were 3·16 in Durham, 3·22 in Lancashire, 3·48 in Staffordshire, and 4·11 in Monmouthshire. In the twenty-eight great towns the rate was 2·76, ranging from 0·72 in Norwich, and 0·74 in Halifax, to 4·26 in Manchester, 4·32 in Salford, 4·75 in Newcastle-upon-Tyne, 4·76 in Preston, and 5·25 in Leeds. In fifty other considerable towns the rate was 2·84, or higher than in the twenty-eight great towns, while in the remainder of England and Wales it was 1·89.

The deaths from *scarlet-fever* numbered 4197, and corresponded to an annual death-rate of 0·62 per 1000, against an average rate of 0·91 for the ten preceding fourth quarters.

No deaths from this disease were registered in Westmorland or Rutlandshire; in the remaining counties the rate varied from 0·04 in Dorsetshire, and 0·06 in Wiltshire, to 1·07 in the West Riding, 1·37 in Monmouthshire, and 1·63 in Staffordshire. In the twenty-eight great towns the rate was 0·77, ranging from 0·00 in Plymouth, Bolton, and Halifax, to 1·33 in Sheffield, 1·83 in Newcastle-upon-Tyne, and 3·48 in Leeds. In fifty other considerable towns the rate was 0·94, being thus higher than in the twenty-eight great towns, and was 3·81 in Walsall, 4·16 in Middlesbrough, 5·26 in Wigan, 5·70 in Ashton-under-Lyne, and 6·27 in Dudley. In the remainder of England and Wales, after excluding these seventy-eight towns, the rate was 0·49. Among sub-districts in which the mortality from this disease appears to have been excessive were Gravesend, North Aylesford, Woodstock, Kingswinford, Atherstone, Dronfield, Newton, and Whitkirk.

The deaths from *diarrhœa* numbered 3148, and corresponded to an annual rate of 0·47 per 1000, against an average rate of 0·51 for the ten preceding fourth quarters.

The highest county rates were 0·71 in Durham, 0·84 in Lancashire, and 0·94 in Staffordshire. In the twenty-eight great towns the rate was 0·46, or almost the same as in the country at large; rising, however, to 1·45 in Bolton, 1·48 in Blackburn, and 2·24 in Preston. In fifty other considerable towns the rate was 0·66, being, however, 1·67 in Stoke-upon-Trent, and 1·95 in Dudley; while in the remainder of England and Wales, after excluding the seventy-eight towns, it was 0·43.

The deaths from *measles* numbered 2493, and corresponded to an annual rate of 0·37 per 1000, against an average rate of 0·39 in the ten preceding fourth quarters.

No deaths from this disease were registered in the East Riding, in Surrey (*extra-met.*) or in the little counties of Rutland and Huntingdon, while the highest rates were 0·87 in Durham, and 1·14 in Monmouthshire. In the twenty-eight great towns the rate was 0·51, ranging from 0·00 in Wolverhampton, Leicester, Bolton, Preston, Halifax, and Hull, to 1·41 in Manchester, and 1·75 in Salford. In fifty other considerable towns the rate was 0·56, being thus higher than in the great towns, rising to 2·53 in Barrow-in-Furness, 3·89 in Cambridge, and 4·01 in South

Shields. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 0·26. Among the sub-districts in which the mortality from this disease appears to have been excessive were Romsey, Bridport, South Petherton, and Gainsborough.

The deaths from *fever*, including typhus, enteric fever, and also simple and ill-defined forms of continued fever, numbered 2197, and corresponded to an annual rate of 0·33 per 1000, against an average rate of 0·48 for the ten preceding fourth quarters.

In counties the rate varied from 0·00 in Huntingdonshire and in Rutlandshire, and 0·02 in Dorsetshire, to 0·50 in Monmouthshire and in Lancashire, and 0·54 in Durham. In the twenty-eight great towns the rate was 0·40, ranging from 0·00 in Birkenhead, 0·13 in Norwich and 0·14 in Huddersfield, to 0·77 in Liverpool, 0·85 in Blackburn, and 1·18 in Preston. In fifty other considerable towns the rate was 0·33, rising to 0·72 in Swansea, 0·94 in Ystradyfodwg, and 1·65 in Wigan. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 0·28.

The deaths from *whooping-cough* numbered 1794, and corresponded to an annual rate of 0·27 per 1000, against an average rate of 0·38 for the ten preceding fourth quarters.

The rates varied from 0·07 in Herefordshire, in Hampshire, and in Derbyshire, to 0·37 in Cheshire and Northumberland, 0·39 in London, and 0·52 in Monmouthshire. In the twenty-eight great towns the rate was 0·36, ranging from 0·00 in Wolverhampton, Blackburn, and Halifax, to 1·19 in Brighton, and 1·56 in Huddersfield. In fifty other considerable towns the rate was 0·24, being, however, 1·15 in Chatham, and 1·42 in Macclesfield; while in the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 0·22.

The deaths from *diphtheria* numbered 1227, and corresponded to an annual rate of 0·18 per 1000, against an average rate of 0·14 for the ten preceding fourth quarters. In no single quarter of the last fourteen years had the death-rate from this disease been so high as in the quarter just finished. The returns of mortality from diphtheria are, however, so unsatisfactory, that it is impossible to say with certainty whether there has been a real increase in the disease, or only an increased use of the term in certificates.

No deaths from this disease were registered in Westmorland or Rutlandshire. In the remaining counties the rate varied from 0·03 in Monmouthshire and in Herefordshire, to 0·41 in Middlesex (*extra-met.*) and 0·46 in Bedfordshire and in Huntingdonshire. In the twenty-eight great towns the rate was 0·20, ranging from 0·00 in Wolverhampton, Derby, Blackburn, Huddersfield, and Sheffield, to 0·29 in London, 0·31 in Cardiff, and 0·43 in Plymouth. In fifty other considerable towns the rate was 0·09; while in the remainder of England and Wales, after excluding these seventy-eight towns, it was 0·19. Among the sub-districts in which there appears to have been excessive mortality from this disease were Farnham, Dartford, Steyning, Thrapston, Willingham, Swaffham, Sandal, and Castleford.

The deaths from *small-pox* numbered 231, against 269, 224, and 229 respectively in the three preceding quarters of the year.

Of these 231 deaths, 60 occurred in Durham, 52 in Warwickshire, 32 in Staffordshire, 32 in London, and 23 in Lancashire, leaving only 32 for the remainder of England and Wales.

Of the total deaths from this disease 121 occurred in some or other of the twenty-eight great towns, namely, 40 in Birmingham, 32 each in London and in Sunderland, 12 in Liverpool, 3 in Wolverhampton, and 2 in Newcastle-upon-Tyne.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in fifty other large town districts, and in the rest, or comparatively rural parts, of England and Wales :—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Fourth Quarter
of 1883.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.

50 other Towns -	2·84	0·02	0·56	0·94	0·09	0·24	0·33	0·66
England and Wales, } less the 78 Towns - }	1·89	0·02	0·26	0·49	0·19	0·22	0·28	0·43

CERTIFICATION OF CAUSES OF DEATH.—The causes of 116,974, or 90·7 per cent., of the 128,905 deaths in England and Wales, were certified by registered medical practitioners in attendance during the last illness, and 7057, or 5·5 per cent., by coroners in inquest cases. The causes of the remaining 4874, or 3·8 per cent., of the deaths were uncertified. The proportion of uncertified deaths in London did not exceed 1·3 per cent., whereas it was 4·2 per cent. in the rest of England and Wales. The per-centage of uncertified causes of death did not exceed 0·8 in Wiltshire, 1·1 in the extra-metropolitan portion of Middlesex, 1·3 in the extra-metropolitan portion of Surrey, 1·5 in Berkshire, 1·9 in both Sussex and Hampshire, whereas it ranged upwards to 6·2 in Herefordshire, 6·4 in Cornwall, 6·6 in Rutlandshire, and 7·0 in Durham. In Wales 9·8 per cent. of the causes of death were uncertified, the proportion being 9·4 in South Wales and 10·9 in North Wales.

In the twenty-eight large towns the proportion of uncertified deaths was 2·5 per cent.; but while it was only 1·3 in London, it was 3·5 in the twenty-seven provincial towns. The per-percentages in these provincial towns ranged from 0·0 in Plymouth, 1·2 in Birmingham, 1·3 in Portsmouth, and 1·7 in Leicester, to 5·2 in Hull, 6·0 in Liverpool, 8·0 in Wolverhampton, and 9·6 in Halifax.

VIOLENT DEATHS.—The deaths referred to different forms of violence were 4192 and corresponded to an annual rate of 0·62 per 1000 of the estimated population, and were 3·3 per cent. of the total deaths. The death-rate from violence in the different counties ranged from 0·17 in Rutlandshire, 0·36 in Bedfordshire and Cornwall, and 0·37 in Cambridgeshire, to 0·79 in Warwickshire, 0·80 in the East Riding of Yorkshire, and 0·95 in Monmouthshire; in South Wales it was 0·86. In the twenty-eight large towns the deaths from violence corresponded to an annual rate of 0·71 per 1000; the rates in the several towns ranged from 0·33 in Blackburn, 0·37 in Portsmouth, and 0·38 in Derby, to 1·15 in Liverpool, 1·21 in Newcastle, and 1·47 in Cardiff.

INQUESTS.—During the three months ending December last, 7057 inquest cases were registered, or 5·5 per cent. of the total deaths. The proportion of inquests was rather above the average proportion in the ten preceding corresponding quarters. In the twenty-eight large towns the proportion of inquests to deaths was 6·4 per cent.; it ranged from 2·9 in Oldham and Blackburn, and 3·0 in Preston, to 8·0 in Manchester and Cardiff, 9·4 in Birmingham, and 9·8 in Leicester.

DEATHS IN PUBLIC INSTITUTIONS.—The deaths registered in workhouses, hospitals and public lunatic asylums numbered 12,931, or 10·0 per cent. of the total deaths; this proportion was 0·5 in excess of the mean per-centage in the four quarters of the ten years 1873-82. In the corresponding periods of 1881 and 1882 the proportions of deaths in public institutions were 10·5 and 10·3 per cent.

respectively. In the twenty-eight large towns 7206, or 15·8 per cent., of the deaths were recorded in the principal public institutions, against 15·3 per cent. in the fourth quarter of 1882; the proportion of institution deaths in these towns last quarter ranged from 5·7 in Bolton, 6·5 in Preston, and 7·2 in Huddersfield, to 17·1 in Manchester, 17·2 in Wolverhampton, 20·3 in Brighton, and 20·5 in London. Excluding the twenty-eight great towns the proportion of such deaths in the rest of England and Wales did not exceed 6·9 per cent.

HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending December last in twenty-eight Colonial and Foreign cities, having an aggregate population of rather less than fourteen millions of persons, was 24·0 per 1000. The average rate in the twenty-two European cities was 24·7 per 1000, against 21·2 in twenty-eight of the largest English towns. The lowest death-rates among the twenty-eight Colonial and Foreign cities were 18·2 in Christiania, 19·9 in Baltimore, 20·0 in Brooklyn, and 20·3 in Philadelphia; the rates ranged upwards in the other towns to 28·8 in Amsterdam, 30·3 in Prague, and 34·0 in Lisbon. The forty-three fatal cases of small-pox in Paris last quarter showed a further decline from those returned in the two preceding quarters; the deaths referred to measles and to whooping-cough also showed a marked decline, while the 502 fatal cases of diphtheria and croup considerably exceeded those recorded in the previous quarter. The deaths from typhoid fever in Paris, which in the first three quarters of the year had been 582, 523, and 524, declined last quarter to 440, which were, however, equal to an annual rate of 0·79 per 1000, while in London the rate from the same disease did not exceed 0·36 per 1000. The fatal cases of small-pox in St. Petersburg showed a further decline from those recorded in the three previous quarters; the mortality from scarlet fever and diphtheria, however, showed a marked increase. No less than 339 deaths resulted from small-pox in Prague, against 12, 85, and 177 in the three preceding quarters. Measles caused 166 deaths in Vienna, 91 in Turin, 87 in Berlin, and 76 in Hamburg. The 218 fatal cases of typhus and typhoid fever in St. Petersburg showed a slight further decline from those returned in recent quarters, but were equal to a rate of 0·94 per 1000, while the rate from the same diseases in London did not exceed 0·37 per 1000. Typhoid fever again showed fatal prevalence in New York and Philadelphia. Diphtheria and croup were severely epidemic in Amsterdam throughout the quarter, and caused no fewer than 434 deaths. The fatal cases of diphtheria in Berlin, which had been 486 and 594 in the two preceding quarters, rose to 990 in the last three months of the year; this disease also showed increased prevalence in nearly all the German cities, and in each of the American cities.

The Year 1883.

During the four quarters of 1883, 889,815 births and 522,662 deaths were registered in England and Wales. The *natural* increase of population during the year, by excess of births over deaths, was 367,153, against 391,707 and 372,364 in 1881 and 1882. The estimated increase of population during the year, calculated in accordance with the rate of increase that prevailed during the last inter-censal period (1871-81), was 359,294 and 7,859 less than the excess of births over deaths. According to returns issued by the Board of Trade, 321,914 British emigrants (including 186,273 English, 31,449 Scotch, and 104,192 Irish) left the various ports of the United Kingdom, at which emigration officers are stationed, during last year. This number showed a further increase upon those recorded in the six preceding years. Compared with the returns for 1882, the increase of emigration last year was equal to 13·6 per cent. from England, and 37·2 per cent. from Ireland, whereas the emigration from Scotland showed a decline of 3·4 per cent.

The birth-rate in England and Wales in 1883 was equal to 33·2 and the death-rate to 19·5 per 1000 persons estimated to be living in the middle of the year. The birth-rate showed a further slight decline from the steadily decreasing rates in the six preceding years, and was lower than that recorded in any year since 1849, when it was so low as 32·9. The death-rate was 0·1 below the rate that prevailed in 1882, and, excepting the unprecedentedly low rate in 1881, was lower than that recorded in any year since civil registration came into operation in 1837. The mean annual death-rate during the first three years of the current decade 1881-90 was so low as 19·3 per 1000, and was 2·1 below the mean rate in the preceding ten years 1871-80. This reduced death-rate implies that nearly 165,000 persons in England and Wales survived the last three years, whose deaths would have been recorded had the mean rate of mortality in the preceding decade been maintained.

The 522,662 deaths during 1883 included 122,303 of infants under one year of age, and 139,170 of persons aged upwards of 60 years. The rate of infant mortality, measured by the proportion of deaths under one year of age to registered births, was equal to 137 per 1000, against 130 and 141 in the two preceding years. This proportion of infant mortality averaged 149 per 1000 during the ten years 1871-80, while the mean proportion during the past three years of the current decade was only 136. The rate of mortality during 1883 among persons aged upwards of 60 years was equal to 69·6 per 1000 persons estimated to be living at these ages; in the three preceding years the death-rates of these ages were respectively 68·5, 67·2, and 65·6 per 1000.

The deaths from all causes during the year included 15,099 from diarrhœa, 12,415 from scarlet fever, 9,777 from whooping-cough, 8,961 from measles, 7,789 from fever (including typhus, enteric, and simple or ill-defined), 3,978 from diphtheria, and 953 from small-pox. Thus 58,972 deaths were referred to these principal zymotic diseases, showing a decline of 13,216 from the number returned in 1882; they were equal to a rate of 2·20 per 1,000, against 2·32 and 2·73 in 1881 and 1882. The mean annual death-rate from these zymotic diseases, which had been 3·87, 4·11, and 3·36 per 1000, respectively, in the three decades 1851-60, 1861-70, and 1871-80, did not exceed 2·42 in the first three years of the current decade. Compared with the numbers in 1882 the deaths referred to each of the principal zymotic disease, except diphtheria, showed a decline during 1883. The most marked decline occurred in the fatal cases of whooping-cough and measles, while the increase of deaths from diphtheria did not exceed 222. The death-rate from fever was equal to 0·29 per 1000, against 0·27 and 0·31 in 1881 and 1882; the mean death-rate from this cause in 1881-2-3 was 0·29, whereas in the three most recent decades it was equal to 0·91, 0·89, and 0·49 per 1000 respectively.

During the year, 28,448 inquest cases were registered, equal to 5·4 per cent. of the total deaths; this proportion showed a slight increase upon the average per-centage in recent years. The reported deaths from different forms of violence were 17,231, and 266 above the number in 1882; they were equal to 3·3 per cent. of the deaths from all causes, and to a rate of 0·64 per 1000 of the estimated population, corresponding with the death-rate from violence in 1882.

The foregoing statistics for 1883 are derived from a summary of the returns furnished to the Registrar-General by 2154 local registrars at the close of each quarter of the year. The figures are therefore subject to revision when the causes of death and other details are finally classified and tabled for publication in the Registrar-General's Annual Report for 1883.

PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1873-83**, and in each Quarter of those Years.

YEARS -	1873	1874	1875	1876	1877	1878	1879	1880	1881	1882	1883

* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns which have been supplied by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

Note.—The letter M or IP affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE IX.—Births and Deaths in the Fourth Quarter of 1883, in 28 Foreign Cities having an estimated aggregate Population of 13,714,119 persons.

^a The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

^b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

^c See page 14, note b.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

* The Registration Sub-districts (2154 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse located to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 23rd December.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

a 418 : 1, 2, and 3.—On 1st November 1883, the sub-district of Sleaford, consisting of 21 parishes was dissolved. Ten of those parishes, viz., Anwick, Ashby-de-la-Laund, Bloxholme, Digby, Dorrington, Haverholme, Holdingham, Leasingham, Roxholme, and Ruskington were added to the Billinghay sub-district. Nine parishes, viz., Aunsby, Culverthorpe, Dumbleby, Kelby, New Sleaford, Old Sleaford, Quarrington, Silk-Willoughby, and Swarby were added to the Heckington sub-district. And two parishes, viz., Brancewell and Temple-Bruer were added to the Leadenham sub-district. The parish of South Kyme was severed from the Heckington sub-district and added to the Billinghay sub-district. The designation of the enlarged Heckington sub-district was subsequently altered to Sleaford sub-district.

b 418 : 4.—The 3 cases of fever are described as typhoid.

c 420 : 3.—The Registrar reports that scarlet and typhoid fevers are prevalent at Langworth.

d 422 : 1.—Of the 4 deaths from diphtheria, 3 occurred at Stickford.

e 423 : 4.—The 4 deaths from scarlet fever occurred in one family in the parish of North-Somercoates.

VII.—NORTH MIDLAND COUNTIES.—REGISTRATION SUB-DISTRICTS.—continued.

a 618: 2.—Of the 13 deaths from scarlet fever, 6 occurred at Rhosymedre, and 5 at Cefn Mawr. Of the 5 deaths from diphtheria (all in Denbigh), 3 occurred at Rhosymedre.

b 625: 2.—Of the 4 deaths from scarlet fever, 3 occurred in Festiniog Urban Sanitary District.

c 626: 1.—The 7 deaths from scarlet fever include 5 in Criccieth Urban Sanitary District, where 3 more deaths from the disease occurred within the first three weeks of January.

d 627: 2.—Of the 10 deaths from diphtheria, 2 occurred in Llanfairisgaer, 4 in Llanberis, and 4 in Llanddeiniolen parishes.

e 628: 2.—Of the 14 deaths from measles and 16 from scarlet fever, 12 and 14 respectively occurred in Bangor Urban Sanitary District.

f 630: 2.—Of the 11 deaths from diphtheria, 9 occurred in the parish of Heneglwys.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING DECEMBER 31ST, 1883.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in October was cold during the first week and from the 18th to the 23rd, and mild at other times, particularly so during the last week of the month. The atmospheric pressure was above its average from the 5th to the 13th, and from the 26th, and was below at other times. The sky was mostly cloudy, with but little sunshine; the fall of rain was less than its average at most stations; there were no thunder storms at stations south of Bolton; and there were two or three at northern stations. Fog was prevalent on seven or eight days at stations in the Midland Counties. Snow fell at Halifax on five days.

The weather in November was mostly cold till the 15th, and warm from the 16th to the end of the month. The pressure of the atmosphere was generally below its average from the 4th to the 26th, particularly so on the 6th and 25th. The sky was generally clouded; there were a few bright days only. Rain fell very frequently, and generally in excess of the average. A little snow fell at different places north of latitude 51° , and fog was prevalent at some places on eight or nine days in the month. Thunder storms occurred at several stations south of $51\frac{1}{2}^{\circ}$, and at stations north of 54° .

The weather in December was variable till the 18th day, the temperature being for a few days together in excess of the average, and then for a few days in defect; from the 19th day to the end of the month the weather was unusually mild. The pressure of the atmosphere was variable, being alternately above and below till the 22nd, and constantly in excess from the 23rd day. The fall of rain was a good deal below the average at nearly every station. Snow fell at a few stations during the first half of the month. There was scarcely any fog till the 15th, and from this day till the end of the month it was unusually prevalent, particularly in the S.E. of England, where fog, frequently very dense, and cloudy dull skies were all but constant. The sun was scarcely visible during the last week of the year. During the greater part of this month, whenever the sky was clear, there was a peculiar glow of light visible both before sunrise and after sunset, and at times even through the clouds.

About London till the 7th of October the average daily deficiency was $5^{\circ}\cdot6$; the weather was warmer from the 8th to the 17th, the mean daily excess being $2^{\circ}\cdot0$. The six days, October 18th to 23rd, were cold, being in defect of their mean average temperature by $2^{\circ}\cdot3$, there were then nine days of warm weather, the daily excess being $5^{\circ}\cdot2$. From November 2nd to the 17th the days were cold, the average daily deficiency of mean temperature being $1^{\circ}\cdot7$; this was followed by a like period of 16 days of warm weather, the daily excess being $3^{\circ}\cdot0$; then for six days, from November 18th to December 3rd, the weather was cold, particularly on the 6th of December, on which day it was $9^{\circ}\cdot3$ below the average, the mean daily deficiency of these six days was $6^{\circ}\cdot1$; this was followed by five warm days, the average daily excess being $4^{\circ}\cdot6$, then four days of cold, the deficiency being $2^{\circ}\cdot8$ daily; from the 19th to the end of the year it was warm, and for these 13 days, ending December 31st, the excess was $2^{\circ}\cdot3$ daily.

The mean temperature of the air for October was $50^{\circ}\cdot4$, being $0^{\circ}\cdot9$ and $0^{\circ}\cdot4$ above the averages of 112 years and 42 years respectively; it was $0^{\circ}\cdot4$ lower than in 1882, $5^{\circ}\cdot1$ higher than in 1881, and $4^{\circ}\cdot2$ higher than in 1880.

The mean temperature for November was $43^{\circ}\cdot8$, being $1^{\circ}\cdot5$ and $0^{\circ}\cdot3$ above the averages of 112 years and 42 years respectively; it was $0^{\circ}\cdot3$ higher than in 1882, $4^{\circ}\cdot9$ lower than in 1881, and $1^{\circ}\cdot3$ higher than in 1880.

The mean temperature for December was $40^{\circ}\cdot5$, being $1^{\circ}\cdot4$ and $0^{\circ}\cdot6$ above the averages of 112 years and 42 years respectively; it was $0^{\circ}\cdot4$ and $0^{\circ}\cdot7$, respectively, above 1882 and 1881, and $2^{\circ}\cdot7$ lower than in 1880.

The mean temperature for the quarter was $44^{\circ}\cdot9$, being $1^{\circ}\cdot3$ and $0^{\circ}\cdot4$ above the averages of 112 years and 42 years respectively.

The mean high day temperatures for the air in October was $57^{\circ}\cdot1$, being $1^{\circ}\cdot0$ lower than the average of 42 years; in November it was $49^{\circ}\cdot6$, being $0^{\circ}\cdot7$ higher than the average, and in December was $44^{\circ}\cdot1$, being $0^{\circ}\cdot6$ lower than the average.

The mean low night temperature of the air in October was $44^{\circ}\cdot5$, being $1^{\circ}\cdot0$ higher than the average of 42 years; in November it was $37^{\circ}\cdot8$, being $0^{\circ}\cdot5$ higher than the average; and in December was $36^{\circ}\cdot2$, being $1^{\circ}\cdot0$ higher than the average.

Therefore, the high day temperature was cold during the day in October, and warm at night, in November being warm both day and night, and in December the days were cold and the nights warm.

The mean daily range of temperature in October was $2^{\circ}\cdot0$ smaller than the average, in November it was $0^{\circ}\cdot3$ greater than the average, and in December it was $1^{\circ}\cdot4$ smaller than the average.

The mean temperature of the air in October was $6^{\circ}\cdot4$ lower than in September; in November it was $6^{\circ}\cdot6$ lower than in October, and in December it was $3^{\circ}\cdot3$ lower than in November.

(From the preceding 42 years' observations the decrease of temperature from September to October, is $7^{\circ}\cdot1$; the decrease of temperature from October to November is $6^{\circ}\cdot5$, and the decrease from November to December is $3^{\circ}\cdot6$.)

From September to October there was a decrease of temperature at stations south of 51° of $5^{\circ}5$, between 51° and 52° of $6^{\circ}1$, between 52° and 53° of $6^{\circ}2$, between 53° and 54° of $6^{\circ}6$, and between 54° and 55° of $7^{\circ}1$.

From October to November there was decrease of temperature at stations south of 51° of $5^{\circ}2$, between 51° and 52° of $6^{\circ}6$, between 52° and 53° of $7^{\circ}4$, between 53° and 54° of $6^{\circ}0$, and between 54° and 55° of $6^{\circ}0$.

From November to December there was a decrease of temperature at stations south of 51° of $3^{\circ}4$, between 51° and 52° of $2^{\circ}9$, between 52° and 53° of $2^{\circ}1$, between 53° and 54° of $1^{\circ}7$, and between 54° and 55° of $1^{\circ}4$.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies above the average, and that the minus sign (-) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	OCTOBER.			NOVEMBER.			DECEMBER.		
	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.	1883.	Average.	Departure from Average.
N.W.	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.	3	2½	+ ½	5	2½	+2½	11½	2½	+8½
N.E.	3	3½	- ½	4½	4½	- ½	2	3½	-1
E.	1	3	- 2	0	4	-4	2	2½	+ ½
S.E.	4	1½	+ 2½	2½	2½	0	2	2	-1½
S.	2	2	0	1½	2	- ½	2	2	-2
S.W.	2	4	- 2	2	4	-2	1½	3½	-2
W.	7	10	- 3	10½	8½	+2	6	11	-5
	9	4½	+ 4½	8½	2½	+6	4½	4½	+ ½

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of October are opposite to W. and E.; in November to W. and N.W.; and in December to N.W. and N.E.

The minus sign (-) denotes deficiencies below averages. In October the largest numbers are opposite to S.W., N.E., and S.; in November to N., N.E., and S.; and in December to S.W. and S.

About London the mean daily pressure of the atmosphere till October 4th was below the average by 0.11 in. daily, from the 5th to the 13th it was above by 0.32 in. daily, then for 12 days it was below by 0.10 in. daily; from October 26th to November 3rd, it was above by 0.28 in. daily. A period of 9 days of low readings followed, viz., from November 4th to the 12th, the mean amount for the 9 days being 0.32 in.; from the 13th to the 15th, the barometer readings were above their averages by 0.13 in., and on the 16th and 17th, they were 0.16 in. too low; from the 18th to the 21st, the pressure was in excess averaging 0.08 in.; for 5 days it was below by 0.37 in.; the reading on November 25th, was 28.901 ins., being the lowest mean daily reading

in the quarter ; from November 27th to December 2nd, it was above by 0.33 in. daily, for 2 days it was 0.13 in. too low; from December 5th to 9th, it was daily 0.36 in. too high ; from December 10th to 16th, it was 0.22 in. below the average ; and from December 17th to the end of the year it was high, the average daily excess being 0.30 in. The highest mean daily reading in the quarter was 30.395 ins. on December 25th.

The mean reading of the barometer for the month of October at the height of 160 feet above the level of the sea was 29.800 ins., being 0.092 in. above the average of 42 years; 0.144 in. higher than that in 1882, 0.027 in. lower than in 1881; and 0.095 in. higher than in 1880.

The mean reading of the barometer for the month of November was 29.659 ins., being 0.084 in. below the average of 42 years; 0.127 in. higher than in 1882, 0.126 in. lower than in 1881, and 0.134 in. lower than in 1880.

The mean reading of the barometer for the month of December was 29.983 ins., being 0.195 in. above the average of 42 years, 0.490 in. higher than in 1882, 0.162 in. higher than in 1881; and 0.234 in. higher than in 1880.

From September to October there was an increase of pressure at stations south of 51° of 0.158 in.; between 51° and 52° of 0.153 in.; between 52° and 53° of 0.144 in.; between 53° and 54° of 0.123 in. and north of 54° of 0.103 in.

From October to November there was a decrease of pressure at stations south of 51° of 0.130 in.; between 51° and 52° of 0.156 in.; between 52° and 53° of 0.156 in., between 53° and 54° of 0.172 in., and north of 54° of 0.210 in.

From November to December there was an increase of pressure at stations south of 51° of 0.363 in., between 51° and 52° of 0.350 in., between 52° and 53° of 0.336 in., between 53° and 54° of 0.376 in., and north of 54° of 0.406 in.

Thunderstorms occurred in October on the 3rd at Llandudno, Bolton, and Stonyhurst; on the 17th at Stonyhurst; on the 18th at Bolton, Halifax, and Stonyhurst, and on the 24th at Silloth.

In November, on the 9th at Stonyhurst and Silloth; on the 10th at Guernsey; on the 17th at Osborne, Salisbury, and Bath; on the 20th at Bath and Halifax; on the 22nd at Carlisle; on the 24th at Torquay; and on the 25th at Plymouth, Torquay, Ventnor, and Osborne.

In December, on the 4th at Somerleyton; on the 10th at Halifax, and on the 11th at Bolton and Hull.

Thunder was heard but lightning was not seen in October, on the 3rd at Burslem and Bolton; on the 16th at Llandudno and Halifax; on the 17th at Llandudno; on the 18th at Lancaster. In November, on the 7th at Osborne; on the 17th at Whitechurch; on the 24th at Rugby, and on the 25th at Whitechurch.

Lightning was seen but thunder was not heard in October, on the 3rd at Torquay, Oxford, Wolverhampton, and Halifax; on the 19th at Carlisle; on the 20th at Osborne and Stonyhurst, and on the 21st at Oxford.

In November, on the 20th at Carlisle; on the 22nd at Llandudno and Stonyhurst, and on the 25th at Guernsey, Torquay, Whitechurch, Oxford, and Rugby.

In December, on the 3rd at Blackheath, Oxford, Lowestoft, Wolverhampton, and Hull; and on the 6th at Oxford.

Solar halos were seen in October, on the 2nd at Torquay and Oxford; on the 5th and 10th at Torquay; on the 11th at Stonyhurst; on the 12th and 13th at Halifax; and on the 22nd and 23rd at Torquay.

In November, on the 5th at Torquay and Oxford; on the 6th at Torquay; on the 7th, 10th, and 11th at Oxford; on the 21st at Guernsey; on the 23rd at Torquay and Oxford; on the 24th at Torquay, and on the 25th and 29th at Oxford.

In December, on the 2nd at Halifax; on the 12th at Barnet and Oxford; and on the 23rd at Oxford.

Lunar halos were seen in October, on the 11th at Torquay and Silloth; on the 15th at Cambridge; on the 16th at Torquay and Blackheath; and on the 18th at Cambridge.

In November, on the 7th at Torquay; on the 11th at Burslem and Royston; and on the 17th at Torquay and Bolton.

In December, on the 7th at Blackheath; on the 11th at Oxford and Cambridge; and on the 12th at Blackheath.

Aurora borealis was seen in October, on the 5th at Cambridge, Stonyhurst, Carlisle, and Silloth.

In November, on the 22nd at Llandudno and Silloth; and on the 28th at Blackheath.

In December, on the 1st at Torquay; and on the 2nd at Torquay and Whitechurch.

Snow fell in October, on the 1st at Cambridge; on the 3rd, 17th, 18th, 19th, and 20th at Halifax.

In November, on the 10th at Burslem and Bradford; on the 14th at Royston and Bradford; on the 15th at Bolton; on the 17th at Rugby; on the 19th at Burslem; on the 20th at Silloth; and on the 23rd at Marlborough.

In December, on the 4th at Somerleyton and Hull; on the 5th at Bolton and Hull; on the 6th at Guernsey, Torquay, Ventnor, Osborne, Southbourne, Strathfield Turgiss, Bath, Marlborough, Whitechurch, Blackheath, Barnet, Burslem, Royston, Cardington, Cambridge, Rugby, Wolverhampton, Bolton, Halifax, Silloth and Carlisle; on the 7th at Guernsey; on the 11th at Bolton; on the 14th at Halifax; on the 15th at Bolton, Halifax, and Silloth; on the 16th at Strathfield Turgiss and Rugby; on the 17th at Marlborough, Royston, Cardington, Cambridge, and Hull; and on the 18th at Barnet and Rugby.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING DECEMBER 31st, 1883.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.

Year 1883.	Months.	Pressure of Atmosphere in Month.			Temperature of Air in Month.			Mean Temperature.		Vapour.	Mean Degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Thermometer.		Wind.	Mean Amount of Cloud.	Number of Days in Month.	Rain.

NAMES OF STATIONS.	Mean Pressure of dry Air reduced to the level of the Sea.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of the Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	WIND.				Mean Amount of Orzone.	Mean Amount of Cloud.	Number of Days on which it fell.	RAIN. amount collected.

The highest temperatures of the air were at Somerleyton, $67^{\circ} \cdot 3$; at Hull, $67^{\circ} \cdot 0$; and at Lowestoft, $66^{\circ} \cdot 5$.

The highest temperatures of the air were at *Somerleyton*, 61° S; at *Hudd*, 61° S; and at *Lowestoft*. The lowest temperatures of the air were at *Salisbury*, 18°; at *Carlisle*, 18° S; and at *Rugby*, 19° 0.

The lowest temperatures of the air were at Salisbury, 18° ; at Carnisle, $18^{\circ} 8$; and at Rugby, $18^{\circ} 6$. The greatest ranges of temperature were at Salisbury, $15^{\circ} 7$; at Rugby, $13^{\circ} 6$; and at Barnet and Carlisle, $13^{\circ} 3$.

The greatest ranges of temperature were at Salisbury, $15^{\circ}\cdot 7$; at Rugby, $13^{\circ}\cdot 6$; and at Barnet and $12^{\circ}\cdot 5$. The least daily ranges of temperature were at Guernsey, $7^{\circ}\cdot 7$; at Liverpool, $7^{\circ}\cdot 9$; and at Leeds, $8^{\circ}\cdot 0$.

The least daily ranges of temperature were at Guernsey, 70.7; at Liverpool, 70.9; and at Leeds, 84.7. The greatest number of days of rain were at Nottingham, 82; at Burslem, 71; and at Salisbury, 68.

The greatest number of days of rain were at Nottingham, 82; at Burslem, 71; and at Salisbury, 68.
The least number of days of rain were at Cardington, 39; at Whitchurch and Oxford, 41; and at Blackheath, 43.

The greatest falls of rain were at Bolton, 17·77 inches; at Stonyhurst, 15·92 inches; and at Barnstaple, 15·54 inches.

The greatest falls of rain were at Bolton, 17·77 inches; at Stonyhurst, 15·92 inches; and at Barnstaple, 15·54 inches.
The least falls of rain were at Strathfield Turgiss, 4·94 inches; at Whitechurch, 4·99 inches; and at Cardington, 5·10 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.		Mean Pressure of dry Air reduced to the level of the Sea.	Mean of all Highes. Rains of all Highes. Mean of all Lowest Heat- ings of the Thermometer. Mean Range of Temper- ature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Max- imum in Rays of Sun.	Mean Reading of Min- imum on Grass.	Mean Estimated Strength.	WIND. Relative Pro- portion of				Mean Amount of Ozone.	Mean Amount of Cloud.	RAIN.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberayron, 604.	Blean, 58.	Chorlton, 464.	Evresham, 381.	Hinckley, 404.
Abergavenny, 582.	Blofield, 228.	Christchurch, 93.	Exeter, 272.	Hitchin, 133.
Aberystwith, 605.	Blything, 218.	Church Stretton, 346.		Holbeach, 416.
Abingdon, 115.	Bodmin, 294.	Cirencester, 331.		Holbeck, 499.
Alcester, 397.	Bolton, 461.	Cleobury Mortimer, 347.	Falmouth, 298.	Holborn, 13.
Alderbury (Salisbury), 254.	Bootle, 576.	Clitheroe, 473.	Fareham, 90.	Hollingbourn, 51.
Alnwick, 563.	Bosmere, 211.	Clun, 345.	Faringdon, 114.	Holworthy, 288.
Alresford, 105.	Boston, 417.	Clutton, 316.	Farnham, 33.	Holywell, 617.
Alston, 588.	Bourn, 414.	Cockermouth, 574.	Faversham, 59.	Honiton, 270.
Alton, 106.	Brackley, 156.	Colchester, 196.	Festiniog, 625.	Hoo, 45.
Altrincham, 445.	Bradfield, 118.	Congleton, 448.	Flegg, 220.	Horncastle, 421.
Alverstone, 89.	Bradford-on-Avon, 249.	Conway, 629.	Foleshill, 391.	Horsham, 79.
Amersham, 140.	Bradford (Yorks), 497.	Cookham, 121.	Forde (Montgomery), 615.	Houghton-le-Spring, 551.
Amesbury, 253.	Braintree, 199.	Corwen, 622.	Fordingbridge, 95.	Howden, 518.
Amphill, 173.	Bramley, 500.	Cosford, 204.	Forehoe, 228.	Hoxne, 210.
Andover, 110.	Brampton, 570.	Coventry, 344.	Freebridge Lynn, 238.	Huddersfield, 495.
Anglesey, 630.	Brecknock, 608.	Cranbrook, 52.	Frome, 312.	Hull, 521.
Ashborne, 438.	Brentford, 126.	Crediton, 282.	Fulham, 2.	Hungerford, 113.
Ashby-de-la-Zouch, 406.	Bridge, 56.	Criekhowell, 609.	Fyld, 477.	Hunslet, 493.
Ashton-under-Lyne, 468.	Bridgend, 589.	Cricklade, 242.		Huntingdon, 108.
Aston, 387.	Bridgnorth, 348.	Croydon, 88.		
Atcham (Shrewsbury), 351.	Bridgwater, 807.	Cuckfield, 75.
